

We THE People
In Assembly Initiate the ORDERS
of
The People

Having made our Declaration of the grievances we author and issue these orders to the United Nations Secretary General to comply with these orders immediately.

Our Declaration lists a long string of abuses and these abuses identified are to be addressed.

The United Nations has been involved in agendas that are counter-productive to the people of the world.

1st, The Military of The United States of America is no longer under the authority of the United Nations and will no longer carry out United Nations agendas.

2nd, Cease and desist all United Nations programs and operations affecting the lands and other property of the United States of America.

3rd, Within 72 hours all foreign United Nations Personnel are to physically vacate the geographical area of the United States of America including Manhattan Island and the District of Columbia.

Failure of the United Nations members to comply with these demands is the United Nations members' self-confession of their intent to continue their inhumane agendas and shall be charged with such in the world court.
