SECTION 1105. THE PUBLIC PRINTER SHALL DETERMINE THE FORM AND STYLE IN WHICH THE PRINTING OR BINDING ORDERED BY A DEPARTMENT IS EXECUTED, AND THE MATERIAL AND THE SIZE OF TYPE USED, HAVING PROPER REGARD TO ECONOMY, WORKMANSHIP, AND THE PURPOSES FOR WHICH THE WORK IS NEEDED.

ABOUT THIS MANUAL

By act of Congress the Public Printer is authorized to determine the form and style of Government printing. The *STYLE MANUAL* is the product of many years of public printing experience, and its rules are based on principles of good usage and custom in the printing trade.

Editors and writers whose disciplines have taught them aspects of style different from rules followed in this *MANUAL* will appreciate the difficulty of establishing a single standard. The *STYLE MANUAL* has served Federal printers since 1894, and with this 29th edition, the traditions of printing and graphic arts are carried forward into new technologies.

Essentially, it is a standardization device designed to achieve uniform word and type treatment, and aiming for economy of word use. Such rules as are laid down for the submission of copy to the GPO point to the most economical manner for the preparation and typesetting of manuscript. Following such rules eliminates additional chargeable processing by the GPO.

It should be remembered that the *MANUAL* is primarily a GPO printer's stylebook. Easy rules of grammar cannot be prescribed, for it is assumed that editors are versed in correct expression. As a printer's book, it necessarily uses terms that are obvious to those skilled in the graphic arts. A glossary of such printing terms to be complete would unnecessarily burden the *MANUAL*.

Its rules cannot be regarded as rigid, for the printed word assumes many shapes and variations in type presentation. An effort has been made to provide complete coverage of those elements that enter into the translation of manuscript into type.

Comments and suggestions from users of the *STYLE MANUAL* are invited. All such correspondence should be addressed as follows:

WHAT IS *GPO ACCESS*?

<http://www.access.gpo.gov/su_docs>

History

In 1993, Congress passed Public Law 103–40, amending GPO’s duties to include provisions for the dissemination of information in electronic format. Under the *GPO Access* legislation, the Superintendent of Documents, under the direction of the Public Printer, is required to: (1) Maintain an electronic directory of Federal electronic information; (2) provide a system of online access to the *Congressional Record*, the *Federal Register*, and other appropriate publications as determined by the Superintendent of Documents; (3) operate an electronic storage facility for Federal electronic information (the Storage Facility); and (4) maintain the Federal Bulletin Board, already in existence.¹ Collectively these components are referred to as *GPO Access*. As a result, in June 1994, *GPO Access* was introduced, encouraging and supporting immediate public access to electronic information products of the United States Government.

The vast majority of information currently available via *GPO Access* is information derived from databases used in the printing of Government publications. For example, in the case of congressional publications, GPO’s Congressional Printing Management Division receives a requisition from a congressional office asking that a specific document be processed for online access. Internal GPO communication then establishes authorization, priorities, etc. Subsequent to processing the database for printing, software developed by the Production Department’s Graphic Systems Development Division is used to prepare the data for optimum screen presentation and place it in the form required by commercially procured server software which indexes the data to facilitate effective searching via client software and/or World Wide Web browsers. At the same time, PostScript output of GPO’s automated composition software is processed by Electronic Photocomposition Division personnel via a network version of Adobe’s distiller software to produce files in the Adobe Acrobat PDF (Portable Document Format), which are then programmatically associated with the appropriate online documents. These Production Department computer-based operations are all performed on equipment configured and maintained by personnel of the Electronic Systems Development Division.

¹Senate Report 103–27 incorporated the Federal Bulletin Board, which existed prior to P.L. 103–40, into *GPO Access*.

In order to assist users in all facets of *GPO Access* and to monitor user requirements, the *GPO Access* User Support Team was developed. This team provides the public with a wide range of support for the electronic products and services available through *GPO Access*.

To contact the team, call 202-512-1530 in the D.C. area or toll-free 1-888-293-6498, between the hours of 7 a.m. to 5:30 p.m., EST, Monday through Friday—except Federal holidays. The team can also be contacted by fax at 202-512-1262 or e-mail at gpoaccess@gpo.gov.

Objectives

The objectives of *GPO Access* are as follows:

Improve access to official Federal Government information in electronic formats.

Provide electronic document delivery and online interactive services that are well-designed, easy to use, and available to the public without charge.

Ensure access to a broad spectrum of users with a wide variety of technical capabilities both directly and through an active partnership with Federal Depository Libraries.

Establish and operate an online interactive service that is capable of rapid expansion to meet the needs of Federal agency publishers and public users.

Encourage the use of electronic database standards and permit dissemination of the original document, without rekeying, in print and/or electronic format.

Utilize a variety of dissemination media and methods, including World Wide Web (Web), bulletin board services and online interactive search and retrieval services in order to achieve cost effective information delivery, that is appropriate to both the type of information being disseminated and the needs of users of that information.

Ensure permanent public access to Government information made available through *GPO Access* and the FDLP via direct provision, the electronic storage facility, and development of a distributed networked system of partner institutions.

Provide services to other Federal agencies on a reimbursable basis—saving time, money, and other resources.

Provide access to Government information that is official and complete. GPO secures the integrity of its databases to ensure against unauthorized changes in text or graphics.

Features of *GPO Access*

GPO Access was carefully designed, developed, and implemented so that it is easy to access and use. The free services of *GPO Access* fall within the following categories:

Government information databases available for online use that provide full-text search and retrieval capabilities. These databases include regulatory materials, such as the *Federal Register* and the *Code of Federal Regulations*; Congressional products, such as the *Congressional Record* and *Congressional Bills*; and business materials, such as the *Commerce Business Daily (CBDNet)*.

Individual Federal agency files that are available for download from the FBB (Federal Bulletin Board).

Tools that assist users in finding Government information available for sale or free of charge. These tools include keyword searches that locate information products by topic, title, or agency; lists and tables that may be browsed; and hyperlinks that direct users to related databases and Web sites in order to facilitate their searches and highlight connections among information products. When print and electronic sale products are identified, an electronic order mechanism enables users to purchase them online.

Guides to collections of Federal Government information available for free use at nearly 1,300 Federal depository libraries throughout the United States.

User support.

Everyone can benefit from *GPO Access*

The benefits of *GPO Access* extend to all individuals and groups who have an interest in the workings of the Federal Government. Citizens can obtain vital Federal information instantaneously, allowing for informed participation in the democratic process. Congressional staff members enjoy immediate access to documents they require while engaged in the legislative process. Librarians, legal researchers, and academic institutions have an excellent up-to-date reference and research tool at their fingertips. Procurement officials and public- and private-sector professionals can access relevant data and use it to create new products. The benefits are as numerous as the users who profit from them.

Multiple methods of public access

In recognition of the various needs and technological capabilities of the public, *GPO Access* supports a wide range of information dissemination technologies, from the latest Internet applications to dial-up modem access. Methods compatible with technologies to assist users covered by the Americans with Disabilities Act are also available. To accommodate people without computers, nearly 1,300

Federal depository libraries throughout the United States provide free access to the service through public-access workstations.

The system was designed to serve a large base of users through a variety of methods with the overall goal of ensuring widespread and equitable information dissemination. Statistics gathered on the number of searches and retrievals indicate that *GPO Access* is achieving this goal.

Information

The Government Printing Office recently introduced a new *GPO Access* home page for the Web interface to provide users with easier and more efficient access to online resources. The new home page is available at the following URL (Uniform Resource Locator): <http://www.access.gpo.gov/su_docs>.

The rules of grammar, spelling, punctuation, etc., as stated in this STYLE MANUAL, will serve well when preparing documents for electronic dissemination. Most of the documents currently available via *GPO Access* are derived from databases used in the printing of Government publications. However, as electronic dissemination of Government information continues to grow, the rules as stated in this MANUAL will continue to be the GPO's standard for all document preparation, electronic or otherwise.

1. ADVICE TO AUTHORS AND EDITORS

1.1. This STYLE MANUAL is intended to facilitate Government printing. Careful observance of the following suggestions will aid in expediting your publication and also reduce printing costs.

1.2. Changes on proofs add greatly to the expense of and delay the work. Therefore, copy must be carefully edited before being submitted to the Government Printing Office.

1.3. Legible copy, not faint reproductions, must be furnished.

1.4. Copy should be on one side only with each sheet numbered consecutively. If both sides of reprint copy are to be used, a duplicate set of copy must be furnished.

1.5. To avoid unnecessary expense, it is advisable to have each page begin with a new paragraph.

1.6. Proper names, signatures, figures, foreign words, and technical terms should be written plainly.

1.7. The chemical symbols Al, Cl, Tl are sometimes mistaken for A1, C1, T1. Editors must indicate whether the second character is a letter or a figure.

1.8. Footnote reference marks in text and tables should be arranged consecutively from left to right across each page of copy.

1.9. Photographs, drawings, and legends being used for illustrations should appear in the manuscript where they are to appear. They should be on separate sheets, as they are handled separately during typesetting.

1.10. If a publication is composed of several parts, a scheme of the desired arrangement must accompany the first installment of copy.

1.11. To reduce the possibility of costly blank pages, avoid use of new odd pages and halftitles whenever possible. Generally these refinements should be limited to quality bookwork.

1.12. Samples should be furnished if possible. They should be plainly marked showing the desired type, size of type page, illustrations if any, paper, trim, lettering, and binding.

1.13. In looseleaf or perforated-on-fold work, indicate folio sequence, including blank pages, by circling in blue. Begin with first text page (title). Do not folio separate covers or dividers.

1.14. Indicate on copy if separate or self-cover. When reverse printing in whole or in part is required, indicate if solid or tone.

1.15. Avoid use of oversize fold-ins wherever possible. This can be done by splitting a would-be fold-in and arranging the material to appear as facing pages in the text. Where fold-ins are numerous and cannot be split, consideration should be given to folding and inserting these into an envelope pasted to the inside back cover.

1.16. Every effort should be made to keep complete jobs of over 4 pages to signatures (folded units) of 8, 12, 16, 24, or 32 pages. Where possible, avoid having more than two blank pages at the end.

1.17. Indicate alternative choice of paper on the requisition. Where possible, confine choice of paper to general use items carried in inventory as shown in the GPO Paper Catalog.

1.18. If nonstandard trim sizes and/or type areas are used, indicate head and back margins. Otherwise, GPO will determine the margins.

1.19. Customers should submit copy for running heads and indicate the numbering sequence for folios, including the preliminary pages.

1.20. All corrections should be made on first proofs returned, as later proofs are intended for verification only. All corrections must be indicated on the "R" set of proofs, and only that set should be returned to the Government Printing Office.

1.21. Corrections should be marked in the margins of a proof opposite the indicated errors, not by writing over the print or between the lines. All queries on proofs must be answered.

1.22. The following Government Printing Office and departmental publications relate to material included in the *STYLE MANUAL*. Most may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402. For lists of these and other such publications, request SB-077, Graphic Arts, and SB-087, Communication and Office Skills.

¹In lieu of the traditional mark “tr” used to indicate letter or number transpositions, the striking out of the incorrect letters or numbers and the placement of the correct matter in the margin of the proof is the preferred method of indicating transposition corrections.

²Corrections involving more than two characters should be marked by striking out the entire word or number and placing the correct form in the margin. This mark should be reserved to show transposition of words.

³The form of any query carried should be such that an answer may be given simply by crossing out the complete query if a negative decision is made or the right-hand (question mark) portion to indicate an affirmative answer.

TYPOGRAPHICAL ERRORS

reset 8 pt. C & SC

It does not appear that the earliest printers had ^e  
^{of #} any method of correcting errors before the form  
 was on the press. The learned ^g The learned correctors  
 of the first two centuries of printing were  
[#] not proofreaders in our sense, they were rather  
 what we should term office editors. Their labors  
^{not} were chiefly to see that the proof corresponded to  
 the copy, but that the printed page was correct  
^{≡ /;} in its ^{latinity} ~~that the words were there,~~ ^{stat} and  
 that the sense was right. They cared ^{but} little  
 about orthography, bad letters, or purely printer's  
 errors, and when the text seemed to them wrong  
 they consulted fresh authorities or altered it on  
 their own responsibility. Good proofs, in the  
^{not /;} modern sense, were impossible until professional  
 readers were employed, men who had first a ¹/_M / ¹/_{tr}  
 a printer's education, and then spent many years  
 in the correction of proof. The orthography of  
 English, which for the past century has under-  
 gone little change, was very fluctuating until after  
 the publication of Johnson's Dictionary, and capital-  
 letters, which have been used with considerable regu-  
 larity for the past 80 years, were previously used  
^{tr} on the miss or hit plan. The approach to regu-  
^{it} larity, so far as we have, may be attributed to the  
 growth of a class of professional proofreaders, and  
 it is to them that we owe the correctness of mod-  
^{# /} ern printing. More errors have been found in the  
 Bible than in any other one work. For many gen-  
 erations it was frequently the case that Bibles  
 were brought out stealthily, from fear of govern-  
[□] mental interference. They were frequently  
 printed from imperfect texts, and were often mod-  
 ified to meet the views of those who published  
^{o #} them. The story is related that a certain woman  
 in Germany, who was the wife of a printer, and  
 had become disgusted with the continual assertions  
^{g / of / from} of the superiority of man over woman which  
 she had heard, hurried into the composing room  
 while her husband was at supper and altered a  
^{wo f} sentence in the Bible, which ^{she} was printing, so  
^{g /} that it read Narr instead of Herr, thus making  
 the verse read "And he shall be thy fool" instead  
^A of "and he shall be thy lord." The word not  
 was omitted by Barker, the king's printer in Eng-  
^{land} and in 1632, in printing the seventh commandment, ^{tr over}  
 He was fined £1000 on this account.

812

NOTE.—The system of marking proofs can be made easier by the use of an imaginary vertical line through the center of the type area. The placement of corrections in the left-hand margin for those errors found in the left-hand portion of the proof and in the right-hand margin for right-side errors prevents overcrowding of marks and facilitates corrections.

## 2. GENERAL INSTRUCTIONS

### JOB PLANNING

**2.1.** The use of computers has dramatically altered every phase of the printing industry beginning with the basic planning of each new job. New publications are evaluated by application specialists who review their requirements and design the necessary formats. Each format is made to conform exactly to the copy's specifications for page dimensions, line length, indentions, typefaces, etc. Upon completion, sample pages are produced and submitted to the customer. At this time, the customer agencies are requested to indicate precise details of any style changes because this set of pages serves as a guide for the copy preparer, the beginning of actual production.

**2.2.** In recent years, changes in the needs of the library community have led to a move toward uniform treatment of the component parts of publications. In developing standards to guide publishers of Government books, consideration has been given to the changing needs of those who seek to produce, reference, index, abstract, store, search, and retrieve data. Certain identifying elements shall be printed on all publications in accordance with this MANUAL and with standards developed by the ANSI (American National Standards Institute, Inc.).

#### MAKEUP

**2.3.** When the following elements occur in Government publications, they should appear in the sequence listed below. The designation “new odd page” generally refers to bookwork and is not required in most pamphlet- and magazine-type publications.

- a. *Frontispiece*, faces title page.
- b. *False title* (frontispiece, if any, on back).
- c. *Title page* (new odd page).
- d. *Back of title*, blank, but frequently carries such useful bibliographic information as list of board members, congressional resolution authorizing publication, note of editions and printings, GPO imprint if departmental imprint appears on title page, price notice, etc.
- e. *Letter of transmittal* (new odd page).
- f. *Foreword*, differs from a preface in that it is an introductory note written as an endorsement by a person other than the author

(new odd page). An introduction differs from a foreword or a preface in that it is the initial part of the text; if the book is divided into chapters, it should be the first chapter.

**g.** *Preface*, by author (new odd page).

**h.** *Acknowledgments* (if not part of preface) (new odd page).

**i.** *Contents* (new odd page), immediately followed by list of illustrations and list of tables, as parts of contents.

**j.** *Text*, begins with page 1 (if halftitle is used, begins with p. 3).

**k.** *Glossary* (new odd page).

**l.** *Bibliography* (new odd page).

**m.** *Appendix* (new odd page).

**n.** *Index* (new odd page).

**2.4.** Preliminary pages use small-cap Roman numerals. Pages in the back of the book (index, etc.), use lowercase Roman numerals.

**2.5.** Booklets of 32 pages or less can be printed more economically with a self-cover. A table of contents, title page, foreword, preface, etc., is not usually necessary with so few pages. If some of this preliminary matter is necessary, it is more practical if combined; i.e., contents on cover; contents, title, and foreword on cover 2, etc.

**2.6.** Widow lines (lines less than full width of measure) at top of pages are to be avoided, if possible, but are permitted if absolutely necessary to maintain uniform makeup and page depth. Rewording to fill the line is a much preferred alternative.

**2.7.** Paragraphs may start on the last line of a page, whenever necessary. If it is found necessary to make a short page, the facing page should be of approximate equal depth.

**2.8.** A blank space or sink of 6 picas should be placed at the head of each new odd or even page of 46-pica or greater depth; pages with a depth of from 36 to 45 picas, inclusive, will carry a 5-pica sink; pages less than 36 picas, 4 picas.

**2.9.** When top centered folios are used, the folio on a new page is set 2 points smaller than the top folios. They are centered at the bottom and enclosed in parentheses.

**2.10.** Where running heads with folios are used, heads are included in overall page depth. However, first pages of chapters and pages with bottom folios do not include the folios as part of the overall page depth.

**2.11.** Jobs that have both running heads and bottom folios or just bottom folios will align all of the page numbers on the bottom in the margin, including those on preliminary pages. If at all possible avoid use of running heads in conjunction with bottom folios.

**2.12.** Contents, list of illustrations, preface, or any other matter that makes a page in itself will retain normal 6-pica sink.

**2.13.** Footnote references are repeated in boxheads or in continued lines over tables, unless special orders are given not to do so.

**2.14.** When a table continues, its headnote is repeated without the word *Continued*.

**2.15.** A landscape or broadside table that continues from an even to an odd page must be positioned to read through the center (gutter) of the publication when its size is not sufficient to fill both pages.

**2.16.** A broadside table of less than page width will center on the page.

**2.17.** Centerheads, whether in boldface, caps, caps and small caps, small caps, or italic, should have more space above than below. Uniform spacing should be maintained throughout the page.

**2.18.** In making up a page of two or more columns, text preceding a page-width illustration will be divided equally into the appropriate number of columns above the illustration.

**2.19.** Two or more short footnotes may be combined into one line, with 2 ems of space between.

¹Preliminary.   ²Including imported cases.   ³Imported.

**2.20.** All backstrips should read down (from top to bottom).

#### COPY PREPARATION

**2.21.** At the beginning of each job the proper formats must be plainly marked. New Odd or New Page, Preliminary, Cover, Title, or Back Title should also be plainly indicated.

**2.22.** Copy preparers must mark those things not readily understood when reading the manuscript. They must also mark the correct element identifier code for each data element, as well as indicate other matters of style necessary to give the publication good typographic appearance.

**2.23.** Preparers must indicate the proper subformat at the beginning of each extension; verify folio numbers; and plainly indicate references, footnotes, cut-ins, etc. Unless otherwise marked, text matter will be set in 10-point solid and tables in 7 point. In tables utilizing down rules, unless a specific weight is requested by the customer, hairline rules will be used. (See rule 13.3.)

**2.24.** Quoted, or extract matter, and lists should be set smaller than text with space above and below. Quotation marks at the beginning and end of paragraphs should be omitted. If the same type size is used, quoted matter should be indented 2 ems on both sides with space top and bottom, and initial and closing quotes should be omitted.

## Capitalization

**2.25.** Unusual use of capital and lowercase letters should be indicated by the customer to guarantee correct usage.

## Datelines, addresses, and signatures

**2.26.** Copy preparers must mark caps, small caps, italic, abbreviations, indentions, and line breaks where necessary. (For more detailed instructions, see the chapter “Datelines, Addresses, and Signatures.”)

## Decimals and common fractions

**2.27.** In figure columns containing both decimals and common fractions, such decimals and/or fractions will not be aligned. The columns will be set flush right.

## “Et cetera,” “etc.,” and “and so forth”

**2.28.** In printing a speaker’s language, the words *and so forth* or *et cetera* are preferred, but in FIC & punc. matter *etc.*, is acceptable. If a quoted extract is set in type smaller than that of the preceding text and the speaker has summed up the remainder of the quotation with the words *and so forth* or *et cetera*, these words should be placed at the beginning of the next line, flush and lowercase, and an em dash should be used at the end of the extract.

## Folioing and stamping copy

**2.29.** Folio numbers should be placed in the upper right corner, preferably half an inch from the top.

## Headings

**2.30.** The element identifier codes to be used for all headings must be marked. Caps, caps and small caps, small caps, caps and lowercase, lowercase first up (first word and proper nouns capitalized), or italic must be prepared. (See rule 3.49.)

## Pickup

**2.31.** The jacket number of a job from which matter is to be picked up must be indicated. New matter and pickup matter should conform in style.

## Sidenotes and cut-in notes

**2.32.** Sidenotes and cut-in notes are set each line flush left and ragged right, unless otherwise prepared, and are always set solid. Sidenotes are usually set in 6 point, 4½ picas wide. Footnotes to sidenotes and text should be set 21½ picas.

SEC. 920. Abuse of the rule. An alleged violation of the rule relating to admission to the floor presents a question of privilege (III, 2624, 2625; VI, 579), but not a higher question of privilege than an election case (III, 2626). In one case where an ex-Member was abusing the privilege * * *.

**Signs, symbols, etc.**

**2.33.** All signs, symbols, dashes, superiors, etc., must be plainly marked. Names of Greek letters must be indicated, as they are frequently mistaken for italic or symbols.

**2.34.** Some typesetting systems produce characters that look the same as figures. A lowercase l resembles a figure 1 and a capital O looks like a figure 0. Questionable characters will be printed as figures unless otherwise marked.

**Letters illustrating shape and form**

**2.35.** Capital letters of the text face will be used to illustrate shape and form, as U-shape(d), A-frame, T-bone, and T-rail.

**2.36.** Plurals are formed by adding an apostrophe and the letter s to letters illustrating shape and form, such as T's and Y's. *Golf tee(s)* should be spelled, as shape is not indicated.

**2.37.** A capital letter is used in *U-boat*, *V-8*, and other expressions which have no reference to shape or form.

**“Follow literally” and “FIC & punc.”**

**2.38.** After submittal to the GPO, manuscript copy is rubber-stamped “Fol. lit.” or “FIC & punc.” The difference between these two typesetting instructions is explained thus:

Copy is followed when stamped “Fol. lit.” (follow literally). Copy authorized to be marked “Fol. lit.” must be thoroughly prepared by the requisitioning agency as to capitalization, punctuation (including compounding), abbreviations, signs, symbols, figures, and italic. Such copy, including even obvious errors, will be followed. The lack of preparation on copy so designated shall, in itself, constitute preparation. “Fol. lit.” does not include size and style of type or spacing.

Obvious errors are corrected in copy marked “FIC & punc.” (follow, including capitalization and punctuation).

**2.39.** In congressional hearings, the name of the interrogator or witness who continues speaking is repeated following a head set in boldface, a paragraph enclosed in parentheses, and a paragraph enclosed in brackets.

In a head set in boldface, the title “Mr.” is not used, and “the Honorable” preceding a name is shortened to “Hon.” Street addresses are also deleted. Example: “Statement of Hon. John P. Blank, Member, American Bar Association, Washington, DC.”

**2.40.** Paragraph or section numbers (or letters) followed by figures or letters in parentheses will close up, as “section 7(B)(1)(a),” “paragraph 23(a),” “paragraph b(7),” “paragraph (a)(2);” but section 9(a) (1) and (2); section 7 a and b. In case of an unavoidable

break, division will be made after elements in parentheses, and no hyphen is used.

**2.41. *Bill style.***—Bill copy will be followed as supplied. Bills will be treated as FIC & Punc. This data is transmitted to the GPO via fiber optic transmission with element identifier codes in place, therefore, it is not cost effective to prepare the manuscript as per the GPO Style Manual and update the data once it is in type form.

**2.42.** Copy preparer's instructions, which accompany each job, are written to cover the general style and certain peculiarities or deviations from style. These instructions must be followed.

### **Abbreviations**

**2.43.** In marking abbreviations to be spelled, preparers must show what the spelled form should be, unless the abbreviations are common and not susceptible of more than one construction. An unfamiliar abbreviation, with spelled-out form unavailable, is not changed.

### **TYPE COMPOSITION**

**2.44.** Operators and revisers must study carefully the rules governing composition.

**2.45.** In correcting pickup matter, the operator must indicate plainly on the proof what portion, if any, was actually reset.

**2.46.** Every precaution must be taken to prevent the soiling of proofs, as it is necessary for the reviser to see clearly every mark on the margin of a proof after it has been corrected.

**2.47.** Corrections of queries intended for the author are not to be made. Such queries, however, are not to be carried on jobs going directly to press.

### **Leading and spacing**

**2.48.** Spacing of text is governed by the leading, narrow spacing being more desirable in solid than in leaded matter.

**2.49.** A single justified word space will be used between sentences. This applies to all types of composition.

**2.50.** Center or flush heads set in caps, caps and small caps, small caps, or boldface are keyed with regular justified spaces between words.

**2.51.** Centerheads are set apart from the text by the use of spacing. The amount of space varies with each publication; however, more space is always inserted above a heading than below. In 10-point type, the spacing would be 10 points over and 8 points under a heading; in 8- and 6-point type, the spacing would be 8 points above and 6 points below.

**2.52.** Solid matter (text) is defined as those lines set without horizontal space between them. Leaded text is defined as lines separated by 1 or 2 points of space.

**2.53.** Unless otherwise marked, flush heads are separated from text by 4 points of space above and 2 points of space below in solid matter, and by 6 points of space above and 4 points of space below in leaded matter.

**2.54.** Full-measure numbered or lettered paragraphs and quoted extracts are not separated by space from adjoining matter.

**2.55.** Extracts which are set off from the text by smaller type or are indented on both sides or indented 3 ems on the left side (courtwork only) are separated by 6 points of space in leaded matter and by 4 points of space in solid matter.

**2.56.** Extracts set solid in leaded matter are separated from the text by 6 points.

**2.57.** Flush lines following extracts are separated by 6 points of space in leaded matter and by 4 points in solid matter.

**2.58.** Footnotes are leaded if the text is leaded, and are solid if the text is solid.

**2.59.** Legends are leaded if the text is leaded, and solid if the text is solid. Leaderwork is separated from text by 4 points above and 4 points below.

## **Indentions**

**2.60.** In measures less than 30 picas, the paragraph indention is 1 em. Paragraph indentions in cut-in matter are 3 ems, overs are 2 ems. Datelines and signatures are indented in multiples of 2 ems. Addresses are set flush left.

**2.61.** In matter set 30 picas or wider, the paragraph indention is 2 ems. Paragraph indentions in cut-in matter are 6 ems, overs are 4 ems. Datelines and signatures are indented in multiples of 2 ems. Addresses are set flush left.

**2.62.** In measures less than 30 picas, overruns in hanging indentions are 1 em more than the first line, except that to avoid conflict with a following indention (for example, of a subentry or paragraph), the overrun indention is made 1 em more than the following line.

**2.63.** In matter set 30 picas or wider, overruns in hanging indentions are 2 ems more than the first line, except that to avoid conflict with a following indention (for example, of a subentry or paragraph), the overrun indention is made 2 ems more than the following line.

**2.64.** Indention of matter set in smaller type should be the same, in points, as that of adjoining main-text indented matter.

**2.65.** Two-line centerheads are centered, but heads of three or more lines are set with a hanging indentation.

**2.66.** Overs in flush heads are indented 2 ems in measures less than 30 picas, and 3 ems in wider measures.

### **Legends for illustrations**

**2.67.** It is preferred that legends and explanatory data consisting of one or two lines are set centered, while those with more than two lines are set with a hanging indentation. Legends are set full measure regardless of the width of the illustration. Paragraph style is acceptable.

**2.68.** Legend lines for illustrations which appear broad or turn page (landscape) should be printed to read up; an even-page legend should be on the inside margin and an odd-page legend on the outside margin.

**2.69.** Unless otherwise indicated, legends for illustrations are set in 8-point roman, lowercase.

**2.70.** Periods are used after legends and explanatory remarks beneath illustrations. However, legends without descriptive language do not use a period. (See rule 8.112.)

**2.71.** At the beginning of a legend or standing alone, *Figure* preceding the identifying number or letter is set in caps and small caps and is not abbreviated.

FIGURE 5, *not* FIG. 5

FIGURE A, *not* FIG. A

**2.72.** If a chart carries both a legend and footnotes, the legend is placed above the chart.

**2.73.** Letter symbols used in legends for illustrations are set in lowercase italic without periods.

### **PROOFREADING**

**2.74.** All special instructions, layouts, and style sheets must be sent to the Proof Section with the first installment of each job.

**2.75.** If the proofreader detects inconsistent or erroneous statements, it is his or her duty to query them.

**2.76.** If the grammatical construction of a sentence or clause is questioned by a proofreader and it seems desirable to change the form, he or she must indicate the proposed correction, add a query mark, and enclose all in a circle.

**2.77.** All queries appearing on the copy must be carried to the author's set of proofs.

**2.78.** Proofs that are illegible or are in any manner defective must be called to the attention of the deskperson.

**2.79.** The manner in which correction marks are made on a proof is of considerable importance. Straggling, unsymmetrical characters, disconnected marks placed in the margin above or below the lines to which they relate, irregular lines leading from an incorrect letter or word to a correction, large marks, marks made with a blunt pencil, indistinct marks, and frequent use of the eraser to obliterate marks hastily or incorrectly made are faults to be avoided.

**2.80.** In reading proof of wide tables, the proofreader should place the correction as near as possible to the error. The transposition mark should not be used in little-known words or in figures. It is better to cancel the letters or figures and write them in the margin in the order in which they are to appear.

**2.81.** To assure proper placement of footnotes, the proofreader and reviser must draw a ring around footnote references on the proofs, then check off each corresponding footnote number.

**2.82.** Proofreaders must not make important changes in indentions or tables without consulting the referee.

**2.83.** The marks of the copy preparer will be followed, as he or she is in a position to know more about the peculiarities of a job than one who reads but a small portion of it.

**2.84.** Any mark which will change the proof from the copy as prepared must be circled in the margin.

**2.85.** All instructions on copy must be carried on proof by readers.

**2.86.** Folios of copy must be run by the proofreader and marked on the proof.

**2.87.** All instructions, comments, and extraneous notes on both copy and proofs which are not intended to be set as part of the text must be circled.

## REVISING

### Galley revising

**2.88.** The importance of revising proofs cannot be overemphasized. Although a reviser is not expected to read proof, it is not enough to follow the marks found on the proof. He or she should be alert to detect errors and inconsistencies and must see that all corrections have been properly made and that words or lines have not been transposed or eliminated in making the corrections.

**2.89.** A reviser must not remodel the punctuation of the proofreaders or make any important changes. If an important change should be made, the reviser must submit the proposed change to the supervisor for a decision.

**2.90.** In the body of the work, new pages must be properly indicated on the proof. (For new page information, see "Makeup.")

**2.91.** All instructions and queries on proofs must be transferred to the revised set of proofs.

### **Page revising**

**2.92.** Page revising requires great diligence and care. The reviser must see that the rules governing the instructions of previous workers have been followed.

**2.93.** The reviser is responsible for marking all bleed and off-center pages.

**2.94.** A blank page must be indicated at the bottom of the preceding page.

**2.95.** Special care must be exercised in revising corrected matter. If it appears that a correction has not been made, the reviser should carefully examine each line on the page to see if the correction was inserted in the wrong place.

**2.96.** The following rules must be carefully observed:

**a.** See that the proof is clean and clear; request another if necessary.

**b.** Verify that the galley proofs are in order and that the data on the galleys runs in properly to facilitate continuous makeup.

**c.** Make sure that different sets of proofs of the same job are correctly marked in series (“R,” “2R,” “3R,” etc.); where a sheet is stamped “Another proof,” carry the same designating “R” on the corresponding clean proof. Advance the “R,” “2R,” “3R,” etc., on each set of page proofs returned from the originating office.

**d.** Run the page folios, make sure they are consecutive and that the running heads, if used, are correct. Check connection pages. Verify correct sequence for footnote references and placement. It is imperative that footnotes appear or begin on the same page as their reference, unless style dictates that all footnotes are to appear together in one location.

**e.** Watch for dropouts, doublets, and transpositions.

**f.** Legend lines of full-page illustrations that appear broad should be printed to read up—the even-page legend on the binding or inside margin and the odd-page legend on the outside margin.

**g.** If a footnote is eliminated, do not renumber the footnotes; change footnote to read “Footnote eliminated.”

**2.97.** If a footnote is added in proof, use the preceding number with a superior letter added, as ^{15a}.

**2.98.** Where a table with footnotes falls at the bottom of a page containing footnotes to text, print the table footnotes above the text footnotes, separated by a rule 50 points long, flush left, with spacing on each side of the rule. (See also rule 13.77.)

## Press revising

**2.99.** Press revising calls for the exercise of utmost care. The press reviser must be thoroughly familiar with the style and make-up of Government publications. He or she is required to OK all forms that go to press—bookwork, covers, jobwork, etc., and must see that all queries are answered. A knowledge of the bindery operations required to complete a book or job and familiarity with all types of imposition, folds, etc., is helpful. The reviser must be capable of ascertaining the proper head, back, and side margins for all work, to ensure proper trimming of the completed job.

**2.100.** Although speed is essential when forms reach the press reviser, accuracy is still paramount and must not be sacrificed.

### SIGNATURE MARKS, ETC.

**2.101.** Unless otherwise indicated, signature marks are set in 6-point lowercase and indented 3 ems.

**2.102.** Figures indicating the year should follow the jacket number in signature marks:

125-327-00—4	116-529-00—vol. 1—3
116-529-00—pt. 5—3	

**2.103.** When the allmark (O) and signature or the imprint and signature appear on same page, the signature line is placed below the allmark or imprint. (See rule 2.117.)

**2.104.** The allmark is placed below the page, bulletin, or circular number but above the signature line, if both appear on the same page.

**2.105.** Imprints and signature lines appearing on short pages of text are placed at the bottom of the page.

**2.106.** On a congressional job reprinted because of change, the House and Senate have approved the following styles:

House of Representatives:	Senate:
★17-234-00—2	17-235-00—2 ★(Star Print)

**2.107.** The following forms are used for signature marks in House and Senate documents and reports printed on session jackets:

H. Doc. 73, 00-1—2	S. Doc. 57, 00-1—2
S. Doc. 57, 00-2, pt. 1—2	S. Doc. 57, 00-2, vol. 1—2
H. Rept. 120, 00-2—8	S. Rept. 100, 00-2—9

**2.108.** In a document or report printed on other than a session jacket, use the jacket number, year, and signature number only, omitting the document or report number. (See rule 2.102.)

**2.109.** For pasters, the jacket number, the year, and the page to be faced by the paster are used as follows (note punctuation):

12-344—00 (Face p. 10)

**2.110.** On a paster facing an even page, the marks are placed on the lower right-hand side; on a paster facing an odd page, the marks are placed on the lower left-hand side.

**2.111.** If more than one paster faces the same page, each is numbered as follows:

12-344—00 (Face p. 19) No. 1

12-344—00 (Face p. 19) No. 2

**2.112.** When a paster follows the text, the allmark is placed on the last page of the text and never on the paster.

### REPRINTS, IMPRINTS, AND SALES NOTICES

#### Reprints

**2.113.** To aid bibliographic identification of reprints or revisions, the dates of the original edition and of reprint or revision should be supplied by the author on the title page or in some other suitable place. Thus:

First edition July 1990  
Reprinted July 1995

First printed June 1990  
Revised June 1995

Original edition May 1990  
Reprinted May 1995  
Revised July 1997

**2.114.** The year in the imprint on cover, title page, or elsewhere is not changed from that in the original print, nor are the signatures changed, unless other mends are necessary.

#### Imprints

**2.115.** Unless otherwise stipulated, the Government Printing Office imprint must appear on all printed matter, with the exception of certain classified work.

**2.116.** The full GPO imprint is used on the title page of a congressional speech.

**2.117.** The imprint and allmark are not used together on any page; if one is used, the other is omitted.

**2.118.** The imprint is not used on a halftitle or on any page of a cover, with the exception of congressional hearings.

**2.119.** If there is a title page, the imprint is placed on the title page; but if there is no title page, or if the title page is entirely an illustration, the imprint is placed on the last page of the text 4 ems from flush right and below the bottom folio.

**2.120.** The Government Printing Office crest is used only on Government Printing Office publications. If it is printed on page II, the full imprint is used on the title page; if it is printed on the title page, use the half imprint only, thus—Washington : 2000.

## Sales notices

**2.121.** The use of sales notices is discouraged.

**2.122.** If there is a cover but no title page, the sales notice is printed on the cover. Unless otherwise indicated, if there is a title page, with or without a cover, the sales notice is printed at the bottom of the title page below a cross rule. If there is no cover or title page, the sales notice is printed at the end of the text, below the imprint, and the two are separated by a cross rule.

## Imprint variations

**2.123.** This is one style of an imprint that can appear on the title page.

**2.125.** Outside-purchase publications are identified by an open star at the beginning of the imprint line. These lines are positioned 4 ems from the right margin.

☆ U.S. GOVERNMENT PRINTING OFFICE: 2000—456-789

**2.126.** Publications purchased outside which are reprinted by the GPO use an em dash in lieu of the open star.

—U.S. GOVERNMENT PRINTING OFFICE: 2000—456-789

**2.127.** Jobs set on outside purchase but printed by the GPO use an asterisk in lieu of the open star.

*U.S. GOVERNMENT PRINTING OFFICE: 2000—456-789

**2.128.** Publications produced from camera copy supplied to the GPO are identified by *cc* printed at the end of the line.

U.S. GOVERNMENT PRINTING OFFICE: 2000—123-456-cc

## FRANKING

**2.129.** The franking (mailing) privilege on covers for Government publications should be at least 1⅓ inches from the trim.

## Bibliographies or references

**2.130.** There are many styles available to bibliographers, for there are many classes of documents. A Government bulletin citation, according to one authority, would be treated as follows:

Author's name (if the article is signed); title of article (in quotation marks); the publication (usually in italic), with correct references to volume, number, series, pages, date, and publisher (U.S. Govt. Print. Off.).

Therefore the example would read:

U.S. Department of the Interior, "Highlights in history of forest and related natural source conservation," *Conservation Bulletin*, No. 41 (serial number not italic), Washington, U.S. Dept. of the Interior (or U.S. Govt. Print. Off.), 1997. 1 p. (or p. 1).

Another Government periodical citation would read as follows:

Reese, Herbert Harshman, "How To Select a Sound Horse," *Farmers' Bulletin*, No. 779, pp. 1–26 (1987), U.S. Dept. of Agriculture.

Clarity may be maintained by capitalizing each word in book titles, but only the first word in the title of articles.

Other examples are:

Preston W. Slosson, *The Great Crusade and After: 1914–1928* (New York: Macmillan, 1930)

Edward B. Rosa, "The economic importance of the scientific work of the government," *J. Wash. Acad. Sci.* 10, 342 (1920)

or:

Preston W. Slosson, *The Great Crusade and After: 1914–1928* (New York: Macmillan, 1930)

Edward B. Rosa, "The Economic Importance of the Scientific Work of the Government," *J. Wash. Acad. Sci.* 10, 342 (1920)

Note that the principal words in both book titles and titles of articles are capitalized. Consistency is more important in bibliographic style than the style itself.

The science of bibliography is covered in many texts, and the following references are available for study:

### 3. CAPITALIZATION RULES

(See also “Abbreviations and Letter Symbols” and “Capitalization Examples”)

**3.1.** It is impossible to give rules that will cover every conceivable problem in capitalization; but by considering the purpose to be served and the underlying principles, it is possible to attain a considerable degree of uniformity. The list of approved forms given in chapter 4 will serve as a guide. Obviously such a list cannot be complete. The correct usage with respect to any term not included can be determined by analogy or by application of the rules.

#### Proper names

**3.2.** Proper names are capitalized.

Rome	John Macadam	Italy
Brussels	Macadam family	Anglo-Saxon

#### Derivatives of proper names

**3.3.** Derivatives of proper names used with a proper meaning are capitalized.

Roman (of Rome)	Johannean	Italian
-----------------	-----------	---------

**3.4.** Derivatives of proper names used with acquired independent common meaning, or no longer identified with such names, are set lowercased. Since this depends upon general and long-continued usage, a more definite and all-inclusive rule cannot be formulated in advance.

roman (type)	macadam (crushed	italicize
brussels sprouts	rock)	anglicize
venetian blinds	watt (electric unit)	pasteurize
	plaster of paris	

#### Common nouns and adjectives in proper names

**3.5.** A common noun or adjective forming an essential part of a proper name is capitalized; the common noun used alone as a substitute for the name of a place or thing is not capitalized.

Massachusetts Avenue; the avenue  
Washington Monument; the monument  
Statue of Liberty; the statue  
Hoover Dam; the dam  
Boston Light; the light  
Modoc National Forest; the national forest  
Panama Canal; the canal  
Soldiers' Home of Ohio; the soldiers' home  
Johnson House (hotel); Johnson house (residence)  
Crow Reservation; the reservation

Federal Express; the express  
 Cape of Good Hope; the cape  
 Jersey City  
 Washington City  
*but* city of Washington; the city  
 Cook County; the county  
 Great Lakes; the lakes  
 Lake of the Woods; the lake  
 North Platte River; the river  
 Lower California  
*but* lower Mississippi  
 Charles the First; Charles I  
 Seventeenth Census; the 1960 census

**3.6.** If a common noun or adjective forming an essential part of a name becomes separated from the rest of the name by an intervening common noun or adjective, the entire expression is no longer a proper noun and is therefore not capitalized.

Union Station: union passenger station  
 Eastern States: eastern farming States  
 United States popularly elected government

**3.7.** A common noun used alone as a well-known short form of a specific proper name is capitalized.

the Capitol building in Washington, DC; *but* State capitol building  
 the Channel (English Channel)  
 the Chunnel (tunnel below English Channel)

## 5. SPELLING

(See also “Compounding Examples” and “Abbreviations and Letter Symbols”)

**5.1.** The Government Printing Office uses Webster’s Third New International Dictionary as its guide for the spelling of words not appearing in the MANUAL. Colloquial and dialect spellings are not used unless required by the subject matter or specially requested. The tendency of some producers of computer-assisted publications to rely on the limited capability of some spell-checking programs adds importance to the MANUAL’s list.

### Preferred and difficult spellings

**5.2.** In addition to indicating the preferred forms of words with variant spellings, the list also contains other words frequently misspelled or causing uncertainty. (See also “Word Division,” a supplement to the STYLE MANUAL.)

**5.20.** The spelling of geographic names must conform to the decisions of the U.S. Board on Geographic Names (BGN). In the absence of such a decision, the U.S. Directory of Post Offices is to be used.

**5.21.** If the decisions or the rules of the BGN permit the use of either the local official form or the conventional English form, it is the prerogative of the originating office to select the form which is most suitable for the matter in hand; therefore, in marking copy or reading proof, it is required only to verify the spelling of the particular form used. The Government Printing Office preference is for the conventional English form. Copy will be followed as to accents, but these should be consistent throughout the entire job.

**Nationalities, etc.**

## 6. COMPOUNDING RULES

(See also “Compounding Examples”)

**6.1.** A compound word is a union of two or more words, either with or without a hyphen. It conveys a unit idea that is not as clearly or quickly conveyed by the component words in unconnected succession. The hyphen is a mark of punctuation that not only unites but separates the component words, and thus facilitates understanding, aids readability, and ensures correct pronunciation. When compound words must be divided at the end of a line, such division should be made leaving prefixes and combining forms of more than one syllable intact.

**6.2.** In applying the rules in this chapter and in using the list of examples in the following chapter, “Compounding Examples,” the fluid nature of our language should be kept in mind. Word forms constantly undergo modification. Two-word forms, which often acquired the hyphen first, frequently bypass the hyphen stage and instantly assume a one-word form.

**6.3.** The rules, therefore, are somewhat flexible. Exceptions must necessarily be allowed. Current language trends continue to point to closing up certain words which, through either frequent use or widespread dissemination through modern media exposure, have become fixed in the reader’s mind as units of thought. The tendency to merge two short words continues to be a natural progression toward better communication.

### General rules

**6.4.** In general, omit the hyphen when words appear in regular order and the omission causes no ambiguity in sense or sound.

banking hours	day laborer	palm oil	training ship
blood pressure	eye opener	patent right	violin teacher
book value	fellow citizen	real estate	
census taker	living costs	rock candy	

**6.5.** Words are usually combined to express a literal or nonliteral (figurative) unit idea that would not be as clearly expressed in unconnected succession.

afterglow	cupboard	gentleman	right-of-way
bookkeeping	forget-me-not	newsprint	whitewash

**6.6.** A derivative of a compound retains the solid or hyphenated form of the original compound unless otherwise indicated.

coldbloodedness	ill-advisedly	praiseworthiness	Y-shaped
footnoting	outlawry	railroader	

**6.7.** A hyphen is used to avoid doubling a vowel or tripling a consonant, except after the short prefixes *co*, *de*, *pre*, *pro*, and *re*, which are generally printed solid. (See also rules 6.29 and 6.32.)

cooperation	micro-organism	thimble-eye	<i>but</i>

## 7. COMPOUNDING EXAMPLES

**7.1.** The following examples are based on the rules for compounding found in chapter 6. Obviously, this list or any other list of compound words could not possibly be a complete reference due to sheer volume. However, an analogy of the words listed with like prefixes and suffixes together with an application of the rules will result in easier handling of those compound words not listed.

**7.2.** In order to keep the list from becoming cumbersome, certain restrictions had to be adopted.

**7.3.** The listing of hyphenated compounds ending in *ed* was kept to a minimum. The rationale was to provide one or two examples under a keyword rather than needless repetition.

**7.4.** Similarly, many two-word forms which create no difficulty were omitted.

**7.5.** Care was exercised to achieve fuller coverage of solid compounds, particularly when the adopted form is different than that of Webster's Third New International Dictionary. This dictionary is our guide for spelling with the exception of those words listed in rule 5.2. It is not our guide to compounding.

**7.6.** A distinction exists between words used in a literal sense and a nonliteral sense. With few exceptions, two-word forms invariably convey a literal meaning, while one-word forms usually express a nonliteral interpretation. For example, a person may have an interesting *sideline* or hobby, but be forced to sit on the *side line* during periods of inactivity.

**7.7.** Distinction should also be made in the compounding of two words to form an adjective modifier and the use of the same words as a predicate adjective; e.g., "crystal-clear water," *but* "the water is crystal clear"; "fire-tested material," *but* "the material is fire tested."

**7.8.** Caution should be exercised when distinguishing whether a succession of words is being used as a compound or whether they simply appear together. Consider, for example, "We know *someone* should do it and who that *some one* ought to be."

**7.9.** For better appearance, it may sometimes be necessary to treat alike words which would have different forms when they appear separately; e.g., *bumblebee* and *queen bee*, *farmhand* and *ranch hand*. In juxtaposition, these and similar words should be

made uniform by being printed as two words. This is only a temporary expedient and does not supersede the list.

**7.10.** Combining forms and prefixes are usually printed solid. For greater readability, the hyphen is sometimes used to avoid doubling a vowel (*anti-inflation, naso-orbital*); to facilitate a normally capitalized word (*mid-April, non-European*); to assure distinct pronunciation of each element of a compound or ready comprehension of intended meaning (*contra-ion, un-ionized*); or to join a combining form or prefix to a hyphenated compound (*equi-gram-molar, pro-mother-in-law*).

**7.11.** As nouns and adjectives, *holdup, calldown, layout, makeup*, and similar words should be printed solid. Their *er* derivatives (*holder-up, caller-down, layer-out, and maker-up*) require hyphens. Such compounds as *run-in, run-on*, and *tie-in* resist quick comprehension when solid. They are therefore hyphenated.

**7.12.** Words spelled alike but pronounced differently, such as *tear-dimmed* and *tearsheet, wind tunnel* and *windup*, are listed under the same keyword.

**7.13.** Words printed flush in the following list combine with the words which follow to indicate solid or hyphenated compounds. A spacemark (#) appearing before an indented entry indicates a two-word form, but two-word forms appearing in the adjective position usually take a hyphen.

**7.14.** To indicate word function, several abbreviations have been appended. They are: *adv.*, adverb; *n.*, noun; *v.*, verb; *u.m.*, unit modifier; *pref.*, prefix; *c.f.*, combining form; and *conj.*, conjunction.

## 8. PUNCTUATION

**8.1.** Punctuation is used to clarify the meaning of written or printed language. Well-planned word order requires a minimum of punctuation. The trend toward less punctuation calls for skillful phrasing to avoid ambiguity and to ensure exact interpretation. The *MANUAL* can only offer general rules of text treatment. A rigid design or pattern of punctuation cannot be laid down, except in broad terms. The adopted style, however, must be consistent and based on sentence structure.

**8.2.** The general principles governing the use of punctuation are: If it does not clarify the text it should be omitted; and, in the choice and placing of punctuation marks, the sole aim should be to bring out more clearly the author's thought. Punctuation should aid reading and prevent misreading.

### Apostrophes and possessives

**8.3.** All singular nouns form their possessive case by the addition of an apostrophe and an *s*. Plural nouns ending in *s* form their plurals by adding only an apostrophe. Some irregular plurals require both an apostrophe and an *s*.

boss's, bosses'  
child's, children's  
citizen's, citizens'  
Congress's, Congresses'  
criterion's, criteria's  
Co.'s, Cos.'  
datum's, data's

erratum's, errata's  
hostess's, hostesses'  
lady's, ladies'  
man's, men's  
medium's, media's  
people's, peoples'  
prince's, princes'

Consider, also, the forms below:

following Robert's Rules of Order  
the planet Mars's craters  
a study of Socrates's writings  
Charles Dickens's novels  
Robert Burns's immortal poetry  
President Adams's defense of law

Jefferson Davis's home

*but*  
the runner's Achilles' heel  
moved by Jesus' tears  
the United States position

**8.4.** In compound nouns, the 's is added to the element nearest the object possessed.

comptroller general's decision  
attorneys general's appointments  
Mr. Brown of New York's motion

attorney at law's fee  
John White, Jr.'s (no comma) ac-  
count

**8.5.** Joint possession is indicated by placing an apostrophe on the last element of a series, while individual or alternative possession requires the use of an apostrophe on each element of a series.

soldiers and sailors' home	Carter's or Reagan's administration
Brown & Nelson's store	Mrs. Smith's and Mrs. Allen's children
men's, women's, and children's clothing	the Army's and the Navy's work
St. Michael's Men's Club	master's and doctor's degrees
editor's or proofreader's opinion	

**8.6.** In the use of an apostrophe in firm names, the names of organizations and institutions, the titles of books, and geographic names, the authentic form is to be followed. (Note use of "St.")

Masters, Mates & Pilots' Association	St. Elizabeths Hospital
Dentists' Supply Co. of New York	Johns Hopkins University
International Ladies' Garment Workers' Union	Hinds' Precedents
Court of St. James's	Harpers Ferry
St. Peter's Church	Hells Canyon
	Reader's Digest
	<i>but</i> Martha's Vineyard

**8.7.** Generally, the apostrophe should not be used after names of countries and other organized bodies ending in *s*, or after words more descriptive than possessive (not indicating personal possession), except when plural does not end in *s*.

United States control	technicians guide
United Nations meeting	teachers college
Southern States industries	merchants exchange
Massachusetts laws	children's hospital
Bureau of Ships report	Young Men's Christian Association
Actors Equity Association	<i>but</i>
House of Representatives session	Veterans' Administration
Teamsters Union	(now Department of Veterans Affairs)
editors handbook	Congress's attitude
syrup producers manual	

**8.8.** Possessive pronouns do not take an apostrophe.

its	yours
ours	hers
theirs	whose

**8.9.** Possessive indefinite or impersonal pronouns require an apostrophe.

each other's books	someone's guesstimate
some others' plans	<i>but</i> someone else's proposal
one's home is his castle	
another's idea	

**8.10.** The singular possessive case is used in such general terms as the following:

arm's length	cow's milk	printer's ink
attorney's fees	distiller's grain	traveler's checks
author's alterations	fuller's earth	writer's cramp
confectioner's sugar	miner's inch	

**8.11.** While an apostrophe is used to indicate possession and contractions, it is not generally necessary to use an apostrophe simply to show the plural form of most acronyms, initialisms, or abbreviations, except where clarity and sense demand such inclusion.

49ers	e'er (ever)
TVers	class of '92 (1992)
OKs	spirit of '76 (1776)
MCing	
RIFing	<i>not</i> in her '70s (age)
RIFs	better: in her seventies
RIFed	
YWCA's	<i>not</i> during the '20s
ABCs	better: during the 1920s or
1920s	during the twenties
IOUs	
10s (thread)	<i>but</i>
4½s (bonds)	he never crosses his t's
3s (golf)	she fails to dot her i's
2 by 4s	a's, &'s, 7's
IQs	watch your p's and q's
don't (do not)	are they l's or 1's
I've (I have)	the Oakland A's
it's (it is/it has)	a number of s's
ne'er (never)	his résumé had too many I's

**8.12.** The apostrophe is omitted in abbreviations, and also in shortened forms of certain other words.

Danl., <i>not</i> Dan'l	Halloween, <i>not</i> Hallowe'en
phone, <i>not</i> 'phone	copter, <i>not</i> 'copter
coon, <i>not</i> 'coon	
possum, <i>not</i> 'possum	<i>but</i> ma'am

**8.13.** The plural of spelled-out numbers, of words referred to as words, and of words containing an apostrophe is formed by adding *s* or *es*; but *'s* is added to indicate the plural of words used as words if omission of the apostrophe would cause difficulty in reading.

twos, threes, sevens	yeses and noes
ands, ifs, and buts	yeas and nays
ins and outs	
the haves and have-nots	<i>but</i>
ups and downs	do's and don'ts
whereases and wherefores	which's and that's
pros and cons	

**8.14.** The possessive case is often used in lieu of an objective phrase even though ownership is not involved.

1 day's labor (labor for 1 day)	for charity's sake
12 days' labor	for pity's sake
2 hours' traveltime	several billion dollars' worth
a stone's throw	
2 weeks' pay	<i>but</i> \$10 billion worth

**8.15.** The possessive case is not used in such expressions as the following, in which one noun modifies another.

day labor (labor by the day)	State prison
quartermaster stores	State rights

**8.16.** For euphony, nouns ending in *s* or *ce* and followed by a word beginning with *s* form the possessive by adding an apostrophe only.

for goodness' sake  
Mr. Hughes' service  
for old times' sake

for acquaintance' sake  
for conscience' sake

**8.17.** A possessive noun used in an adjective sense requires the addition of 's.

He is a friend of John's.  
Stern's is running a sale.

**8.18.** A noun preceding a gerund should be in the possessive case.

in the event of Mary's leaving  
the ship's hovering nearby

**8.61.** To indicate an interruption or an unfinished word or sentence. A 2-em dash is used when the interruption is by a person other than the speaker, and a 1-em dash will show self-interrup-

**Ellipses**

**8.76.** Three asterisks (preferred form) or three periods, separated by en spaces, are used to denote an ellipsis within a sentence, at the beginning or end of a sentence, or in two or more consecutive sentences. To achieve faithful reproduction of excerpt material, editors using period ellipses should indicate placement of the terminal period in relation to an ellipsis at the end of a sentence. Note, in the following examples, the additional spacing necessary to clearly define commas and the terminal period when period ellipses are employed.

The Senate having tried Andrew Johnson, President of the United States, upon articles of impeachment exhibited against him by the

House of Representatives, and two-thirds of the Senators present not having found him guilty of the charges contained in the second, third, and eleventh articles of impeachment, it is therefore

*Ordered and adjudged.* That the said Andrew Johnson, President of the United States be, and he is, acquitted of the charges in said articles made and set forth.

The Senate having tried Andrew Johnson * * * upon articles of impeachment * * * and two-thirds of the Senators present not having found him guilty of the charges * * *, it is therefore

**8.79.** A line of asterisks indicates an omission of one or more entire paragraphs. In 26½-pica or wider measure, a line of “stars” means seven asterisks indented 2 ems at each end of the line, with the remaining space divided evenly between the asterisks. In measures less than 26½ picas, five asterisks are used. Quotation marks are not used on a line of asterisks in quoted matter. Where an ellipsis line ends a complete quotation, no closing quote is used.

* * * * *

**8.80.** Indented matter in 26½-pica or wider measure also requires a seven-asterisk line to indicate the omission of one or more entire paragraphs.

**8.81.** If an omission occurs in the last part of a paragraph immediately before a line of asterisks, three asterisks are used, in addition to the line of asterisks, to indicate such an omission.

**8.82.** Equalize spacing above and below an ellipsis line.

## Exclamation point

**8.83.** The exclamation point is used to mark surprise, incredulity, admiration, appeal, or other strong emotion which may be expressed even in a declarative or interrogative sentence.

He acknowledged the fatal error!

How breathtakingly beautiful!

Timber!

Mayday! Mayday!

**8.84.** In direct address, either to a person or a personified object, *O* is used without an exclamation point, or other punctuation; but

if strong feeling is expressed, an exclamation point is placed at the end of the statement.

O my friend, let us consider this subject impartially.  
O Lord, save Thy people!

**8.85.** In exclamations without direct address or appeal, *oh* is used instead of *O*, and the exclamation point is omitted.

15a. Classes, grades, and sizes.

**8.99.** If both a figure and a letter in parentheses are used before each paragraph, a period and an en space are used after the closing parenthesis. If the figure is not repeated before each letter in parentheses but is used only before the first letter, the period is placed after the figure. However, if the figure is not repeated before each letter in parentheses and no period is used, space is inserted after the number if at least one other lettered subsection appears.

15(a). When the figure is used before the letter in each paragraph—

15(b). The period is placed after the closing parenthesis.

## 9. ABBREVIATIONS AND LETTER SYMBOLS

**9.1.** Abbreviations and letter symbols are used to save space and to avoid distracting the reader by use of repetitious words or phrases.

**9.2.** The nature of the publication governs the extent to which abbreviations are used. In text of technical and legal publications, and in parentheses, brackets, footnotes, sidenotes, tables, leaderwork, and bibliographies, many words are frequently abbreviated. Heads, legends, tables of contents, and indexes follow the style of the text.

**9.3.** Internal and terminal punctuation in symbols representing units of measure are to be omitted to conform with practice adopted by scientific, technical, and industrial groups. Where omission of terminal punctuation causes confusion; e.g., the symbol *in* (inch) mistaken for the preposition *in*, the symbol should be spelled out.

**9.4.** Standard and easily understood forms are preferable, and they should be uniform throughout a job. Abbreviations not generally known should be followed in the text by the spelled-out forms in parentheses the first time they occur; in tables and leaderwork such explanatory matter should be supplied in a footnote. As the printer cannot rewrite the copy, the author should supply these explanatory forms.

**9.5.** In technical matter, symbols for units of measure should be used only with figures; similarly, many other abbreviations and symbols should not appear in isolation. For example, energy is measured in foot-pounds, *not* energy is measured in ft•lbs.

### Capitals, hyphens, periods (points), and spacing

**9.6.** In general, an abbreviation follows the capitalization and hyphenation of the word or words abbreviated. It is followed by a period unless otherwise indicated.

**9.7.** Abbreviations and initials of a personal name with points are set without spaces. Abbreviations composed of contractions and initials or numbers, will retain space.

"Other organized bodies" shall be interpreted to mean organized bodies that have become popularly identified with a symbol, such as MIT (Massachusetts Institute of Technology), GM (General Motors), GMAC (General Motors Acceptance Corp.), etc. (See "List of Abbreviations.") Symbols, when they appear in copy, may be used for acts of Congress. Example: ARA (Area Redevelopment Act).

## Acronyms, coined words, and symbols

**9.48.** To obtain uniform treatment in the formation of acronyms, coined words, and symbols, apply the formulas that follow:

Use all capital letters when only the first letter of each word or selected words is used to make up the symbol:

- EPCOT (Experimental Prototype Community of Tomorrow)
- MAG (Military Advisory Group)
- MIRV (multiple independently targetable reentry vehicle)
- SALT (strategic arms limitation talks); (*avoid* SALT talks)

Use all capital letters where first letters of prefixes and/or suffixes are utilized as part of established expressions:

- CPR (*cardiopulmonary resuscitation*)
- ESP (*extrasensory perception*)
- FLIR (*forward-looking infrared*)

Copy must be followed where an acronym or abbreviated form is copy-righted or established by law:

- ACTION (agency of Government; not an acronym)
- MarAd (*Maritime Administration*)
- NACo (*National Association of Counties*)
- MEDLARS (*Medical Literature Analysis and Retrieval System*)

Use caps and lowercase when proper names are used in shortened form, any word of which uses more than the first letter of each word:

letter, not against the figures. Note the following related abbreviations and letter symbols and their usages:

**9.55.** The word *o'clock* is not used with abbreviations of time.

*not* 10 o'clock p.m.

**9.56.** Metric unit letter symbols are set lowercase roman unless the unit name has been derived from a proper name, in which case the first letter of the symbol is capitalized (for example Pa for pascal and W for watt). The exception is the letter L for liter. The same form is used for singular and plural. The preferred symbol for *cubic centimeter* is *cm*³; use *cc* only when requested.

A space is used between a figure and a unit symbol except in the case of the symbols for degree, minute, and second of plane angle.

## 10. SIGNS AND SYMBOLS

**10.1.** The increased use of signs and symbols and their importance in technical and scientific work have emphasized the necessity of standardization on a national basis and of the consistent use of the standard forms.

**10.2.** Certain symbols are standardized—number symbols (the digits, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9); letter symbols (the letters of the alphabet, a, b, c, d, etc.); and graphic symbols (the mathematical signs +, −, ±, ×, ÷).

**10.3.** The signs +, −, ±, ×, and ÷, etc., are closed against accompanying figures and symbols. When the × is used to indicate “crossed with” (in plant or animal breeding) or magnification, it will be separated from the accompanying words by a space.

i-vii + 1-288 pages  
The equation  $A+B$   
The result is  $4 \times 4$   
 $20,000 \pm 5,000$

Early June × Bright (crossed with)  
× 4 (magnification)

### Symbols with figures

**10.4.** In technical publications the degree mark is used in lieu of the word *degree* following a figure denoting measurement.

**10.5.** Following a figure, the spelled form is preferred. The percent symbol is used in areas where space will not allow the word *percent* to be used.

In that period the price rose 12, 15, and 19 percent.

*not* In that period the price rose 12 percent, 15 percent, and 19 percent.

**10.6.** Any symbol set close up to figures, such as the degree mark, dollar mark, or cent mark, is used before or after each figure in a group or series.

\$5 to \$8 price range  
5'-7' long, *not* 5-7' long  
3¢ to 5¢ (no spaces)  
±2 to ±7; 2°±1°

*but*  
§ 12 (thin space)  
from 15 to 25 percent  
45 to 65 °F *not* 45° to 65° F

### Letter symbols

**10.7.** Letter symbols are set in italic (see rule 10.8) or in roman (see rule 9.56) without periods and are capitalized only if so shown in copy, since the capitalized form may have an entirely different meaning.

## Equations

**10.8.** In mathematical equations, use italic for all letter symbols—capitals, lowercase, small capitals, and superiors and inferiors (exponents and subscripts); use roman for figures, including superiors and inferiors.

**10.9.** If an equation or a mathematical expression needs to be divided, break before  $+$ ,  $-$ ,  $=$ , etc. However, the equal sign is to clear on the left of other beginning mathematical signs.

**10.10.** A short equation in text should not be broken at the end of a line. Space out the line so that the equation will begin on the next line; or better, center the equation on a line by itself.

**10.11.** An equation too long for one line is set flush left, the second half of the equation is set flush right, and the two parts are balanced as nearly as possible.

**10.12.** Two or more equations in a series are aligned on the equal signs and centered on the longest equation in the group.

**10.13.** Connecting words of explanation, such as *hence*, *therefore*, and *similarly*, are set flush left either on the same line with the equation or on a separate line.

**10.14.** Parentheses, braces, brackets, integral signs, and summation signs should be of the same height as the mathematical expressions they include.

**10.15.** Inferiors precede superiors if they appear together; but if either inferior or superior is too long, the two are aligned on the left.

## Chemical symbols

**10.16.** The names and symbols listed below are approved by the International Union of Pure and Applied Chemistry. They are set in roman without periods.

¹The atomic weights of many elements are not invariant but depend on the origin and treatment of the material. The values of atomic weight given here apply to elements as they exist naturally on Earth and to certain artificial elements. Values in parentheses are used for radioactive elements whose atomic weights cannot be quoted precisely without knowledge of the origin of the elements. The value given is the atomic mass number of the isotope of that element of longest known half life.

## Standardized symbols

**10.17.** Symbols duly standardized by any national scientific, professional, or technical group are accepted as preferred forms within the field of the group. The issuing office desiring or requiring the use of such standardized symbols should see that copy is prepared accordingly.

## Signs and symbols

**10.18.** The following list contains some signs and symbols frequently used in printing. The forms and style of many symbols vary with the method of reproduction employed. It is important that editors and writers clearly identify signs and symbols when they appear within a manuscript.

## 11. ITALIC

(See also “Abbreviations and Letter Symbols” and “Datelines, Addresses, and Signatures”)

**11.1.** Italic is sometimes used to differentiate or to give greater prominence to words, phrases, etc. However, an excessive amount of italic defeats this purpose and should be restricted.

### Emphasis, foreign words, and titles of publications

**11.2.** Italic is not used for mere emphasis, foreign words, or the titles of publications.

**11.3.** In nonlegal work, *ante*, *post*, *infra*, and *supra* are italicized only when part of a legal citation. Otherwise these terms, as well as the abbreviations *id.*, *ibid.*, *op. cit.*, *et seq.*, and other foreign words, phrases, and their abbreviations, are printed in roman.

**11.4.** When “emphasis supplied,” “emphasis added,” or “emphasis ours” appears in copy, it should not be changed; but “underscore supplied” should be changed to “italic supplied.”

**11.5.** When copy is submitted with instructions to set “all roman (no italic),” these instructions will not apply to *Ordered*, *Resolved*, *Be it enacted*, etc.; titles following signatures or addresses; or the parts of datelines which are always set in italic.

### Names of aircraft, vessels, and spacecraft

**11.6.** The names of aircraft, vessels, and spacecraft are italicized unless otherwise indicated. In lists set in columns and in stubs and reading columns of tables consisting entirely of such names they will be set in roman. Missiles and rockets will be set in caps and lowercase and will not be italicized.

**11.7.** Names of vessels are quoted in matter printed in other than lowercase roman.

*Sinking of the "Lusitania"*  
**Sinking of the "Lusitania"**

SINKING OF THE "LUSITANIA"  
 SINKING OF THE "LUSITANIA"

### Names of legal cases

**11.8.** The names of legal cases are italicized, except for the *v.* When requested, the names of such cases may be set in roman with an italic *v.* In matter set in italic, legal cases are set in roman with the *v.* being set roman.

<p><i>"The Hornet" and "The Hood,"</i> 124          F.2d 45  <i>Smith v. ----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

### Scientific names

**11.9.** The scientific names of genera, subgenera, species, and subspecies (varieties) are italicized, but are set in roman in italic matter; the names of groups of higher rank than genera (phyla, classes, orders, families, tribes, etc.) are printed in roman.

*A.s. perpallidus*  
*Dorothia?* sp. (roman "?")  
*Tsuga canadensis*  
*Cypripedium parviflorum* var. *pubescens*  
 the genera *Quercus* and *Liriodendron*  
 the family Leguminosae; the family Nessiteras rhombopteryx  
*Measurements of specimens of Cyanoderma erythroptera neocara*

**11.10.** Quotation marks should be used in place of italic for scientific names appearing in lines set in caps, caps and small caps, or boldface, even if there is italic type available in the series.

### Words and letters

**11.11.** The words *Resolved*, *Resolved further*, *Provided*, *Provided, however*, *Provided further*, *And provided further*, and *ordered*, in bills, acts, resolutions, and formal contracts and agreements are italicized; also the words *To be continued*, *Continued on p. —*, *Continued from p. —*, and *See* and *see also* (in indexes and tables of contents only).

*Resolved*, That (resolution)  
*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That  
 [To be continued] (centered; no period)  
 [Continued from p. 3] (centered; no period)  
*see also* Mechanical data (index entry)

**11.12.** All letters (caps, small caps, lowercase, superiors, and inferiors) used as symbols are italicized. In italic matter roman letters are used. Chemical symbols (even in italic matter) and certain other standardized symbols are set in roman.

*n*th degree; *x* dollars

$$D + 0.025V_m^{2.7} = 0.042/G - 1V_m^{2.7}$$

**11.13.** Letter designations in mathematical and scientific matter, except chemical symbols, are italicized.

**11.14.** Letter symbols used in legends to illustrations, drawings, etc., or in text as references to such material, are set in italic without periods and are capitalized if so shown in copy.

**11.15.** Letters (*a*), (*b*), (*c*), etc., and *a*, *b*, *c*, etc., used to indicate sections or paragraphs, are italicized in general work but not in laws and other legal documents.

## 12. NUMERALS

(See also "Tabular Work" and "Leaderwork")

**12.1.** Most rules for the use of numerals are based on the general principle that the reader comprehends numerals more readily than numerical word expressions, particularly in technical, scientific, or statistical matter. However, for special reasons, numbers are spelled out in certain instances, except in FIC & punc. and Fol. Lit. matter.

**12.2.** The following rules cover the most common conditions that require a choice between the use of numerals and words. Some of them, however, are based on typographic appearance rather than on the general principle stated above.

**12.3.** Arabic numerals are preferable to Roman numerals.

### NUMBERS EXPRESSED IN FIGURES

**12.4.** A figure is used for a single number of *10* or more with the exception of the first word of the sentence. (See also rules 12.9 and 12.23.)

50 ballots  
10 guns  
24 horses

nearly 13 buckets  
about 40 men  
10 times as large

### Numbers and numbers in series

**12.5.** When 2 or more numbers appear in a sentence and 1 of them is *10* or larger, figures are used for each number. (See supporting rule 12.6.)

Each of 15 major commodities (9 metal and 6 nonmetal) was in supply.  
*but* Each of nine major commodities (five metal and four nonmetal) was in supply.

Petroleum came from 16 fields, of which 8 were discovered in 1956.

*but* Only nine of these were among the large manufacturing companies, and only three were among the largest concerns.

There were three 6-room houses, five 4-room houses, and three 2-room cottages, and they were built by 20 carpenters. (See rule 12.21.)

*but* If two columns of sums of money add or subtract one into the other and one carries points and ciphers, the other should also carry points and ciphers.

At the hearing, only one Senator and one Congressman testified.  
There are four or five things which can be done.

**12.6.** A unit of measurement, time, or money (as defined in rule 12.9), which is always expressed in figures, does not affect the use of figures for other numerical expressions within a sentence.

Each of the five girls earned 75 cents an hour.

Each of the 15 girls earned 75 cents an hour.

A team of four men ran the 1-mile relay in 3 minutes 20 seconds.

This usually requires from two to five washes and a total time of 2 to 4 hours.

This usually requires 9 to 12 washes and a total time of 2 to 4 hours.

The contractor, one engineer, and one surveyor inspected the 1-mile road.

*but* There were two six-room houses, three four-room houses, and four two-room cottages, and they were built by nine workers in thirty 5-day weeks. (See rule 12.21.)

**12.7.** Figures are used for serial numbers.

## Measurement and time

**12.9.** Units of measurement and time, actual or implied, are expressed in figures.

For two or more separate years not representing a continuous period, a comma is used instead of a dash (1875, 1879); if the word *from* precedes the year or the word *inclusive* follows it, the second year is not shortened and the word *to* is used in lieu of the dash (from 1933 to 1936; 1935 to 1936, inclusive).

In dates, *A.D.* precedes the year (*A.D.* 937); *B.C.* follows the year (254 *B.C.*).

**d. Decimals:** In text a cipher should be supplied before a decimal point if there is no whole unit, and ciphers should be omitted after a decimal point unless they indicate exact measurement.

**12.10.** Except as indicated in rules 12.11 and 12.19, and also for day preceding month, figures are used in text and footnotes to text for serial ordinal numbers beginning with *10th*. In tables, leaderwork, footnotes to tables and leaderwork, and in sidenotes, figures are used at all times. Military units are expressed in figures at all times when not the beginning of a sentence, except *Corps*. (For ordinals in addresses, see rule 12.13.)

29th of May, <i>but</i> May 29	12th Regiment
First Congress; 102d Congress	9th Naval District
ninth century; 20th century	7th Fleet
Second Congressional District;	7th Air Force
20th Congressional District	7th Task Force
seventh region; 17th region	
eighth parallel; 38th parallel	<i>but</i>
fifth ward; 12th ward	XII Corps (Army usage)
ninth birthday; 66th birthday	Court of Appeals for the Tenth
first grade; 11th grade	Circuit
1st Army	Seventeenth Decennial Census
1st Cavalry Division	(title)
323d Fighter Wing	

**12.11.** When ordinals appear in juxtaposition and one of them is *10th* or more, figures are used for such ordinal numbers.

This legislation was passed in the 1st session of the 102d Congress.  
 He served in the 9th and 10th Congresses.  
 From the 1st to the 92d Congress.  
 He represented the 1st, 4th, and 13th wards.  
 We read the 8th and 12th chapters.  
*but* The district comprised the first and second precincts.  
 He represented the first, third, and fourth regions.  
 The report was the sixth in a series of 14.

**12.12.** Ordinals and numerals appearing in a sentence are treated according to the separate rules dealing with ordinals and numerals standing alone or in a group. (See rules 12.4, 12.5, and 12.24.)

The fourth group contained three items.  
 The fourth group contained 12 items.  
 The 8th and 10th groups contained three and four items, respectively.  
 The eighth and ninth groups contained 9 and 12 items, respectively.

**12.13.** Beginning with *10th*, figures are used in text matter for numbered streets, avenues, etc. However, figures are used at all times and *street*, *avenue*, etc. are abbreviated in sidenotes, tables, leaderwork, and footnotes to tables and leaderwork.

First Street NW.; *also* in parentheses: (Fifth Street) (13th Street); 810 West 12th Street; North First Street; 1021 121st Street; 2031 18th Street North; 711 Fifth Avenue; 518 10th Avenue; 51–35 61st Avenue

## Punctuation

**12.14.** The comma is used in a number containing four or more digits, except in serial numbers, common and decimal fractions, astronomical and military time, and kilocycles and meters of not more than four figures pertaining to radio.

## Chemical formulas

**12.15.** In chemical formulas full-sized figures are used before the symbol or group of symbols to which they relate, and inferior figures are used after the symbol.

### NUMBERS SPELLED OUT

**12.16.** Spell out numerals at the beginning of a sentence or head. Rephrase a sentence or head to avoid beginning with figures. (See rule 12.25 for related numbers.)

Five years ago * * *; *not* 5 years ago * * *

Five hundred and fifty men hired * * *; *not* 550 men hired * * *

“Five-Year Plan Announced”; *not* “5-Year Plan Announced” (head)

The year 1965 seems far off * * *; *not* 1965 seems far off * * *

Workers numbering 207,843 * * *; *not* 207,843 Workers * * *

Benefits of \$69,603,566 * * *; *not* \$69,603,566 worth of benefits * * *

1958 REPORT *change to* THE 1958 REPORT

\$3,000 BUDGETED *change to* THE SUM OF \$3,000 BUDGETED

4 MILLION JOBLESS *change to* JOBLESS NUMBER 4 MILLION

**12.17.** In testimony, hearings, transcripts, and question and answer matter, figures are used immediately following Q. and A. or name of interrogator or witness for years (e.g., 1999), sums of money, decimals, street numbers, and for numerical expressions beginning with *101*.

Mr. BIRCH, Junior. 1977 was a good year.

Mr. BELL. \$1 per share was the return. Two dollars in 1956 was the alltime high. Nineteen hundred and seventy-eight may be another story.

Colonel DAVIS. 92 cents.

Mr. SMITH. 12.8 people.

Mr. JONES. 1240 Pennsylvania Avenue NW., Washington, DC 20004.

Mr. SMITH. Ninety-eight persons.

Q. 101 years? *But* Q. One hundred years?

A. 200 years.

Mr. SMITH. Ten-year average would be how much?

**12.18.** A spelled-out number should not be repeated in figures, except in legal documents. In such instances use these forms:

five (5) dollars, *not* five dollars (5)

ten dollars (\$10), *not* ten (\$10) dollars

**12.19.** Numbers appearing as part of proper names, used in a hypothetical or inexact sense, or mentioned in connection with serious and dignified subjects such as Executive orders, legal proclamations, and in formal writing are spelled out.

Three Rivers, PA, Fifteenmile Creek, etc.

the Thirteen Original States

threescore years and ten	back to square one
Ten Commandments	behind the eight ball

**12.20.** If spelled out, numbers larger than 1,000 should be set in the following form:

two thousand and twenty  
 one thousand eight hundred and fifty  
 one hundred and fifty-two thousand three hundred and five  
 eighteen hundred and fifty (serial number)

**12.21.** Numbers of less than 100 preceding a compound modifier containing a figure are spelled out.

two $\frac{3}{4}$ -inch boards	<i>but</i>
twelve 6-inch guns	120 8-inch boards
two 5-percent discounts	three four-room houses

**12.22.** Indefinite expressions are spelled out.

the seventies; the early seventies; <i>but</i> the early 1870s or 1970s	midthirties (age, years, money) a thousand and one reasons
in his eighties, <i>not</i> his '80's <i>nor</i> 80's	<i>but</i>

Words such as *nearly*, *about*, *around*, *approximately*, etc., do not reflect indefinite expressions.

The bass weighed about 6 pounds.  
 She was nearly 8 years old.

**12.23.** Except as indicated in rules 12.5 and 12.9, a number less than 10 is spelled out within a sentence.

six horses	<i>but</i>
five wells	$3\frac{1}{2}$ cans
eight times as large	$2\frac{1}{2}$ times or 2.5 times

**12.24.** For typographic appearance and easy grasp of large numbers beginning with *million*, the word *million* or *billion* is used.

The following are guides to treatment of figures as submitted in copy. If copy reads—

\$12,000,000, *change to* \$12 million  
 2,750,000,000 dollars, *change to* \$2,750 million

 \$½ billion to \$1¼ billion (note full figure with second fraction); \$1¼ to \$1½ billion  
 three-quarters of a billion dollars  
 5 or 10 billion dollars' worth

**12.25.** Related numbers appearing at the beginning of a sentence, separated by no more than three words, are treated alike.

Fifty or sixty more miles away is snowclad Mount Everest.

Sixty and, quite often, seventy listeners responded.

*but* Fifty or, in some instances, almost 60 applications were filed.

## Fractions

**12.26.** Mixed fractions are always expressed in figures. Fractions standing alone, however, or if followed by *of a* or *of an*, are generally spelled out. (See also rule 12.28.)

three-fourths of an inch; <i>not</i> ¾	two one-hundredths
inch <i>nor</i> ¾ of an inch	one-thousandth
one-half inch	five one-thousandths
one-half of a farm; <i>not</i> ½ of a farm	thirty-five one-thousandths
one-fourth inch	<i>but</i>
seven-tenths of 1 percent	½ to 1¾ pages
three-quarters of an inch	½-inch pipe
half an inch	½-inch-diameter pipe
a quarter of an inch	3½ cans
one-tenth portion	2½ times
one-hundredth	

**12.27.** Fractions ( $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ ,  $\frac{3}{8}$ ,  $\frac{5}{8}$ ,  $\frac{7}{8}$ ,  $\frac{1}{2954}$ ) or full-sized figures with the shilling mark ( $\frac{1}{4}$ ,  $\frac{1}{2954}$ ) may be used only when either is specifically requested. A comma should not be used in any part of a built-up fraction of four or more digits or in decimals. (See rule 12.9e.)

**12.28.** Fractions are used in a unit modifier.

½-inch pipe; *not* one-half-inch pipe      ¼-mile run      ⅞-point rise

**Roman numerals**

**12.29.** A repeated letter repeats its value; a letter placed after one of greater value adds to it; a letter placed before one of greater value subtracts from it; a dashline over a letter denotes multiplied by 1,000.

## 13. TABULAR WORK

(See also “Abbreviations and Letter Symbols”; and “Leaderwork”)

**13.1.** The object of a table is to present in a concise and orderly manner information that cannot be presented as clearly in any other way.

**13.2.** Tabular material should be kept as simple as possible, so that the meaning of the data can be easily grasped by the user.

**13.3.** Tables shall be set without down (vertical) rules when there is at least an em space between columns, except where: (1) In the judgment of the Government Printing Office down rules are required for clarity; or (2) the agency has indicated on the copy they are to be used. The mere presence of down rules in copy or enclosed sample is not considered a request that down rules be used. The publication dictates the type size used in setting tables. Tabular work in the Congressional Record is set 6 on 7. The balance of congressional tabular work sets 7 on 8.

### Abbreviations

**13.4.** To avoid burdening tabular text, commonly known abbreviations are used in tables. Metric and unit-of-measurement abbreviations are used with figures.

**13.5.** The names of months (except May, June, and July) when followed by the day are abbreviated.

**13.6.** The words *street*, *avenue*, *place*, *road*, *square*, *boulevard*, *terrace*, *drive*, *court*, and *building*, following name or number, are abbreviated. For numbered streets, avenues, etc., figures are used.

**13.7.** Abbreviate the words *United States* if preceding the word *Government*, the name of any Government organization, or as an adjective generally.

**13.8.** Use the abbreviations *RR.* and *Ry.* following a name, and *SS*, *MS*, etc., preceding a name.

**13.9.** Use *lat.* and *long.* with figures.

**13.10.** Abbreviate, when followed by figures, the various parts of publications, as *article*, *part*, *section*, etc.

**13.11.** Use, generally, such abbreviations and contractions as *98th Cong.*, *1st sess.*, *H. Res. 5*, *H.J. Res. 21*, *S. Doc. 62*, *S. Rept. 410*, *Rev. Stat.*, etc.

**13.12.** In columns containing names of persons, copy is followed as to abbreviations of given names.

**13.13.** Periods are not used after abbreviations followed by leaders.

**Bearoff** (normally an en space)

**13.14.** An en space is used for all bearoffs.

**13.15.** In a crowded table, when down rules are necessary, the bearoff may be reduced in figure columns.

**13.16.** Fractions are set flush right to the bearoff of the allotted column width, and not aligned.

**13.17.** Mathematical signs, parentheses, fractions, and brackets are set with a normal bearoff.

**Boxheads**

**13.18.** Periods are omitted after all boxheads, but a dash is used after any boxhead which reads into the matter following.

**13.19.** Boxheads run crosswise.

**13.20.** Boxheads are set solid, even in leaded tables.

**13.21.** Boxheads are centered horizontally and vertically.

**Down-Rule Style (See Rule 13.3)**

**13.22.** In referring to quantity of things, the word *Number* in boxheads is spelled if possible.

**13.23.** Column numbers or letters in parentheses may be set under boxheads, and are separated by a quadline below the deepest head. (If alignment of parentheses is required within the table, use brackets in boxhead.) These column references align across the table. Units of quantity are set in parentheses within boxheads.

**13.24.** Leaders may be supplied in a column consisting entirely of symbols or years or dates or any combination of these.

**Centerheads, flush entries, and subentries**

**13.25.** Heads follow the style of the tables as to the use of figures and abbreviations.

**13.26.** Punctuation is omitted after centerheads. Flush entries and subentries over subordinate items are followed by a colon (single subentry to run in, preserving the colon), but a dash is used instead of a colon when the entry reads into the matter below.

**13.27.** In reading columns if the centerhead clears the reading matter below by at least an em the space is omitted; if it clears by less than an em, a space is used. If an overrun, rule, etc., in another column, or in the same column, creates a blank space above the head, the extra space is not added.

**13.28.** Units of quantity and years used as heads in reading and figure columns are set in italic with space above and no space below.

**No-Down-Rule Style (Preferred).** The rules are used here to aid readability.

**Ciphers**

**13.29.** Where the first number in a column or under a cross rule is wholly a decimal, a cipher is added at the left of its decimal point. A cipher used alone in a money or other decimal column is placed in the unit row and is not followed by a period. In mixed units the cipher repeats before decimals unless the group totals.

**13.33.** Copy is followed in the use of the word *None* or a cipher to indicate *None* in figure columns. If neither one appears in the copy, leaders are inserted, unless a clear is specifically requested.

**13.34.** In columns of figures under the heading £ *s d*, if a whole number of pounds is given, one cipher is supplied under *s* and one under *d*; if only shillings are given, one cipher is supplied under *d*.

**13.35.** In columns of figures under *Ft In*, if only feet are given, supply cipher under *In*; if only inches are given, clear under *Ft*; if ciphers are used for *None*, place one cipher under both *Ft* and *In*.

**13.36.** In any column containing sums of money, the period and ciphers are omitted if the column consists entirely of whole dollars.

**Continued heads**

**13.37.** In continued lines an em dash is used between the head and the word *Continued*. No period is carried after a continued line.

**13.38.** Continued heads over tables will be worded exactly like the table heading. Notes above tables are repeated; footnote references are repeated in boxheads and in continued lines.

**Dashes or rules**

**13.39.** Rules are not carried in reading columns or columns consisting of serial or tracing numbers, but are carried through all figure columns.

**13.40.** Parallel rules are used to cut off figures from other figures below that are added or subtracted; also, generally, above a grand total.

**Ditto (do.)**

**13.41.** The abbreviation *do.* is used to indicate that the previous line is being repeated instead of repeating the line, verbatim, over and over. It is used in reading columns only, lowercased and preceded by leaders (6 periods) when there is matter in preceding column. If ditto marks are requested, closing quotes will be used.

**13.42.** Capitalize *Do.* in the first and last columns. These are indented 1 or 2 ems, depending on the length of the word being repeated, or the width of the column; the situation will determine as it is encountered.

**13.43.** In mixed columns made up of figure and reading-matter items, *do.* is used only under the latter items.

**13.44.** *Do.* is not used—

- (1) In a figure or symbol column (tracing columns are figure columns);
- (2) In the first line under a centerhead in the column in which the centerhead occurs;
- (3) Under a line of leaders or a rule;
- (4) Under an item italicized or set in boldface type for a specific reason (italic or boldface *do.* is never used; item is repeated);
- (5) Under an abbreviated unit of quantity or other abbreviations; or
- (6) Under words of three letters or less.

**13.45.** *Do.* is used, however, under a clear space and under the word *None* in a reading column.

**13.46.** *Do.* does not apply to a reference mark on the preceding item. The reference mark, if needed, is added to *do.*

**13.47.** Leaders are not used before *Do.* in the first column or before or after *Do.* in the last column.

**13.48.** In a first and/or last column 6 ems or less in width, a 1-em space is used before *Do.* In all other columns 6 ems or less in width, six periods are used. Bearoff is not included.

**13.49.** In a first and/or last column more than 6 ems in width, 2 ems of space are used before *Do.* In all other columns more than 6 ems in width, six periods are used. Bearoff space is not included. If the preceding line is indented, the indentation of *Do.* is increased accordingly.

**13.50.** *Do.* under an indented item in an inside reading column, with or without matter in preceding column, is preceded by six periods which are indented to align with item above.

**Dollar mark**

**13.51.** The dollar mark or any other money symbol is placed close to the figure; it is used only at the head of the table and under cross rules when the same unit of value applies to the entire column.

**13.52.** In columns containing mixed amounts (as money, tons, gallons, etc.), the dollar mark, pound mark, peso mark, or other symbol, as required, is repeated before each sum of money.

**13.53.** If several sums of money are grouped together, they are separated from the nonmoney group by a parallel rule, and the symbol is placed on the first figure of the separated group only.

**Figure columns**

**13.57.** Figures align on the right, with an en space bearoff. There is no bearoff on leaders.

**13.58.** In a crowded table the bearoff may be reduced in figure columns only. It is preferable to retain the bearoff.

**13.59.** Figures in parentheses align if so required.

**13.60.** In double rows of figures in a single column, connected by a dash, a plus, or minus sign, and in dates appearing in the form 2-12-43, the dashes or signs can be aligned.

**13.61.** Plus or minus signs at the left of figures are placed against the figures regardless of alignment; plus and minus signs at the right of figures are cleared.

**13.62.** Words and Roman numerals in figure columns are aligned on the right with the figures, without periods.

**13.63.** Figures (including decimal and common fractions) expressing mixed units of quantity (feet, dollars, etc.) and figures in parentheses are aligned on the right.

**13.64.** Decimal points are aligned except in columns containing numbers that refer to mixed units (such as pounds, dollars, and percentage) and have irregular decimals.

**13.65.** It is preferred that all columns in a table consisting entirely of figure columns be centered.

**Footnotes and references**

**13.66.** Footnotes to tables are numbered independently from footnotes to text unless requested by committee or department.

**13.67.** Superior figures are used for footnote references, beginning with 1 in each table.

**13.68.** If figures might lead to ambiguity (for example, in connection with a chemical formula), asterisks, daggers, or italic superior letters, etc., may be used.

**13.69.** When items carry several reference marks, the superior-figure reference precedes an asterisk, dagger, or similar character used for reference. These, in the same sequence, precede mathematical signs. A thin space is used to bear off an asterisk, dagger, or similar character.

**13.70.** Footnote references are repeated in boxheads or in continued lines over tables.

**13.71.** References to footnotes are numbered consecutively across the page from left to right.

**13.72.** Footnote references are placed at the right in reading columns and symbol columns, and at the left in figure columns (also at the left of such words as *None* in figure columns), and are separated by a thin space.

**13.73.** Two or more footnote references occurring together are separated by spaces, not commas.

**13.74.** In a figure column, a footnote reference standing alone is set in parentheses and flushed right. In a reading column, it is set at the left in parentheses and is followed by leaders, but in the last column it is followed by a period, as if it were a word. In a symbol column it is set at the left and cleared.

**13.75.** Numbered footnotes are placed immediately beneath the table. If a sign or letter reference in the heading of a table is to be followed, it is not changed to become the first numbered reference mark. The footnote to it precedes all other footnotes.

**13.76.** For better makeup or appearance, footnotes may be placed at the end of a lengthy table. A line reading "Footnotes at end of table." is supplied.

**13.77.** If the footnotes to both table and text fall together at the bottom of a page, the footnotes to the table are placed above the footnotes to the text, and the two groups are separated by a 50-point rule flush left; but if there are footnotes to the text and none to the table, the 50-point rule is retained.

**13.78.** Footnotes to cut-in and indented tables and tables in rules are set full measure, except when footnotes are short, they can be set in 1 em under indented table.

**13.79.** Footnotes are set as paragraphs, but two or more short footnotes should be combined into one line, separated by not less than 2 ems.

**13.80.** The footnotes and notes to tables are set solid.

**13.81.** Footnotes and notes to tables and boxheads are set the same size, but not smaller than 6 point, unless specified otherwise.

**13.82.** Footnotes to tables follow tabular style in the use of abbreviations, figures, etc.

**13.83.** In footnotes, numbers are expressed in figures, even at the beginning of a note or sentence.

**13.84.** If a footnote consists entirely or partly of a table or leaderwork, it should always be preceded by introductory matter carrying the reference number; if necessary, the copy preparer should add an introductory line, such as "1 See the following table:".

**13.85.** An explanatory paragraph without specific reference but belonging to the table rather than to the text follows the footnotes, if any, and is separated from them or from the table by space.

**Fractions**

**13.86.** All fractions are set flush right to the bearoff.

**13.87.** Fractions standing alone are expressed in figures, even at the beginning of a line, but not at the beginning of a footnote.

**Headnotes**

**13.88.** Headnotes should be set lowercase, but not smaller than 6 point, bracketed, and period omitted at end, even if the statement is a complete sentence; but periods should not be omitted internally if required by sentence structure.

**13.89.** Headnotes are repeated under continued heads but the word *Continued* is not added to the headnote.

**Indentions and overruns**

**Subentries**

**13.90.** The indentation of subentries is determined by the width of the stub or reading column. Subentries in columns more than 15 ems wide are indented in 2-em units; in columns 15 ems or less, with short entry lines and few overruns, 2-em indentions are also used. All overruns are indented 1 em more.

**13.91.** Subentries in columns of 15 ems or less are indented in 1-em units. Overruns are indented 1 em more.

**Total, mean, and average lines**

**13.92.** All total (also mean and average) lines are indented 3 ems. In very narrow stub columns, total lines may be reduced to 1- or 2-em indentions, depending on length of line.

**13.93.** Where overrun of item above conflicts, the total line is indented 1 em more. Runovers of total lines are also indented 1 em more.

**13.94.** It is not necessary to maintain uniform indentation of the word *Total* throughout the same table. The word *Total* is supplied when not in copy.

**Italic**

**13.95.** Names of vessels and aircraft (except in columns consisting entirely of such names), titles of legal cases (except *v.* for *versus*), and certain scientific terms are set in italic. The word “Total” and headings in the column do not affect the application of this rule. In gothic typefaces without italic, quotes are allowed.

**13.96.** Set “See” and “See also” in roman.

**Leaders**

**13.97.** Leaders run across the entire table except that they are omitted from a last reading column.

**13.98.** The style of leadering is guided by two rules: (1) Tables with a single reading column leader from the bottom line, and (2) tables with any combination of more than one reading or symbol column leader from the top line.

**13.99.** If leadering from the top line, overruns end with a period.

**13.100.** A column of dates is regarded as a reading column only if leaders are added; in all other cases it is treated as a figure column.

**13.101.** In tables with tracing figures on left and right of page, leader from top line.

**Numerals in tables**

**13.102.** Figures, ordinals, and fractions are used in all parts of a table, except fractions which will be spelled out at the beginning of a footnote.

## Parallel and divide tables are discouraged

**13.103.** Parallel tables are set in pairs of pages, beginning on a left-hand page and running across to facing right-hand page; leader from the top line.

**13.104.** Heads and headnotes center across the pair of pages, with 2-em hanging indention for three or more lines when combined measure exceeds 30 picas in width. Two-line heads are set across the pair of pages. A single-line head or headnote is divided evenly, each part set flush right and left, respectively. Words are not divided between pages.

**13.105.** Boxheads and horizontal rules align across both pages.

**13.106.** Boxheads are not divided but are repeated, with *Continued* added.

**13.107.** Tracing figures are carried through from the outside columns of both pages and are set to “leader from the top line.”

**13.108.** In divide tables that are made up parallel, with stub column repeated, the head and headnote repeat on each succeeding page, with *Continued* added to the head only.

**13.109.** Tables with tracing figures or stub, or both, repeating on the left of odd pages, are divide tables and not parallel tables. Over such tables the heads are repeated, with *Continued* added.

## Reading columns

**13.110.** Figures or combinations of figures and letters used to form a reading column align on left and are followed by leaders. *Do.* is not used under such items.

**13.111.** The en dash is not to be used for *to* in a reading column; if both occur, change to *to* throughout.

**13.112.** Cut-in items following a colon are indented 2 ems.

**13.113.** Run in single entry under colon line; retain the colon.

**13.114.** Numerical terms, including numbered streets, avenues, etc., are expressed in figures, even at the beginning of an item.

## Symbol columns

**13.115.** A column consisting entirely of letters, letters and figures, symbols, or signs, or any combination of these, is called a symbol column. It should be set flush left and cleared, except when it takes the place of the stub, it should then be leaded. No closing period is used when such column is the last column. Blank lines in a last column are cleared. *Do.* is not used in a symbol column.

**13.116.** Columns composed of both symbols and figures are treated as figure columns and are set flush right. In case of blank lines in a last column, leaders will be used as in figure columns.

**Tables without rules**

**13.117.** It is preferable to set all tables alike; that is, without either down rules or cross rules and with roman boxheads. When so indicated on copy, by ordering agency, tabular matter may be set without rules, with italic boxheads.

**13.118.** Column heads over figure columns in 6- or 8-point leaderwork are set in 6-point italic.

**13.119.** Horizontal rules (spanner) used between a spread or upper level column heading carried over two or more lower level column headings are set continuous and without break, from left to right, between the two levels of such headings.

### Units of quantity

**13.121.** Units of quantity in stub columns are set in lowercase in plural form and placed in parentheses.

Ferrous alloys (short tons) .....	183,465	² 18,388,766	259,303	² 30,719,756

**13.122.** Units of quantity and other words as headings over figure columns are used at the beginning of a table or at the head of a continued page or continued column in a double-up table.

**13.123.** Over figure columns, units of quantity and other words used as headings, and the abbreviations *a.m.* and *p.m.*, if not included in the boxheads, are set in italic and are placed immediately above the figures, without periods other than abbreviating periods. In congressional work (gothic), or at any time when italic is not available, these units should be placed in the boxheads in parentheses. Any well-known abbreviation will be used to save an over-

run, but if one unit of quantity is abbreviated, all in the same table will be abbreviated. If units change in a column, the new units are set in italic with space above and no space below. The space is placed both above and below only when there is no italic available.

### **Quoted tabular work**

**13.124.** When a table is part of quoted matter, quotation marks will open on each centerhead and each footnote paragraph, and if table is end of quoted matter, quotation marks close at end of footnotes. If there are no footnotes and the table is the end of the quotation, quotation marks close at end of last item.

## 14. LEADERWORK

(See also “Abbreviations and Letter Symbols” and “Tabular Work”)

**14.1.** Leaderwork is a simple form of tabular work without box-heads or rules and is separated from text by 4 points of space above and below in solid matter and 6 points of space in leaded matter. It consists of a reading (stub) column and a figure column, leadered from the bottom line. It may also consist of two reading columns, aligning on the top line. In general, leaderwork (except indexes and tables of contents, which are set the same style as text) is governed by the same rules of style as tabular work. Unless otherwise indicated, leaderwork is set in 8 point. The period is omitted immediately before leaders.

### **Bearoff**

**14.2.** No bearoff is required at the right in a single reading column.

### **Columns**

**14.3.** A figure column is at least an en quad wider than the largest group of figures, but not less than 3 ems in single columns and 2 ems in double-up columns. Total rules are to be the full width of all figure columns.

	<i>Pounds</i>

**14.4.** Where both columns are reading columns, they are separated by an em space.

### Continued heads

14.5. The use of continued heads in leaderwork is not necessary.

### Ditto (do.)

14.6. The abbreviation *do.* is indented and capitalized in the stub. It is capitalized and cleared in last reading column.

### Dollar mark and ciphers

14.7. In a column containing mixed amounts (as money, tons, gallons, etc.) the figures are aligned on the right, and the dollar mark or other symbol is repeated before each sum of money. If several sums of money are grouped and added or subtracted to make a total, they are separated from the nonmoney group by a parallel rule, and the symbol is placed on the first figure of the separated group only.

14.8. If two columns of sums of money add or subtract one into the other and one carries points and ciphers, the other should also carry points and ciphers.

### Flush items and subheads

14.9. Flush items clear the figure column.

14.10. Subheads are centered in full measure.

### Footnotes

14.11. Footnotes to leaderwork follow the style of footnotes to tables.

14.12. Footnote references begin with 1 in each leadered grouping, and footnotes are placed at the end, separated from it by 4 points of space. Separate notes from matter following by not less than 6 points of space.

14.13. If the leaderwork runs over from one page to another, the footnotes will be placed at the bottom of the leadered material.¹

### Units of quantity

14.14. Units of quantity or other words over a stub or figure column are set italic.

14.15. The following example shows the style to be observed where there is a short colon line at left. In case of only one subentry, run in with colon line and preserve the colon.

	<i>Tons</i>

¹Livestock not included.

¹If footnotes to leaderwork and text fall at bottom of page, leaderwork footnotes are placed above text footnotes. The two groups are separated by a 50-point rule.

**14.16.** If there is no colon line, the style is as follows:

## 15. FOOTNOTES, INDEXES, CONTENTS, AND OUTLINES

### FOOTNOTES AND REFERENCE MARKS

**15.1.** Text footnotes follow the style of the text with the exception of those things noted in “Abbreviations and Letter Symbols.” Footnotes appearing in tabular material follow the guidelines set forth in “Tabular Work.”

**15.2.** In a publication divided into chapters, sections, or articles, each beginning a new page, text footnotes begin with 1 in each such division. In a publication without such divisional grouping, footnotes are numbered consecutively from 1 to 99, and then begin with 1 again. However, in supplemental sections, such as appendixes and bibliographies, which are not parts of the publication proper, footnotes begin with 1.

**15.3.** Copy preparers must see that references and footnotes are plainly marked.

**15.4.** If a reference is repeated on another page, it should carry the original footnote; but to avoid repetition of a long note, the copy preparer may use the words “See footnote 3 (6, 10, etc.) on p.—” instead of repeating the entire footnote.

**15.5.** Unless the copy is otherwise marked: (1) Footnotes to 12-point text are set in 8 point; (2) footnotes to 11-point text are set in 8 point, except in Supreme Court reports, in which they are set in 9 point; (3) footnotes to 10- and 8-point text are set in 7 point.

**15.6.** Footnotes are set as paragraphs at the bottom of the page and are separated from the text by a 50-point rule, set flush left, with no less than 2 points of space above and below the rule.

**15.7.** Footnotes to indented matter (other than excerpt footnotes) are set full measure.

**15.8.** To achieve faithful reproduction of indented excerpt material (particularly legal work) containing original footnotes, these footnotes are also indented and placed at the bottom of the excerpt, separated by 6 points of space. No side dash is used. Reference numbers are not changed to fit the numbering sequence of text footnotes.

**15.9.** Footnotes must always begin on the page where they are referenced. If the entire footnote will not fit on the page where it is cited, it will be continued at the bottom of the next page.¹

**15.10.** Footnotes to charts, graphs, and other illustrations should be placed immediately beneath such illustrative material.

**15.11.** A cutoff rule is not required between a chart or graph and its footnotes.

**15.12.** For reference marks use: (1) Roman superior figures, (2) italic superior letters, and (3) symbols. Superior figures (preferred), letters, and symbols are separated from the words to which they apply by thin spaces, unless immediately preceded by periods or commas.

**15.13.** Where reference figures might lead to ambiguity (for example, in matter containing exponents), asterisks, daggers, etc., or italic superior letters may be used.

**15.14.** When symbols or signs are used for footnote reference marks, their sequence should be (*) asterisk, (†) dagger, (‡) double dagger, and (§) section mark. Should more symbols be needed, these may be doubled or tripled, but for simplicity and greater readability, it is preferable to extend the assortment by adding other single-character symbols.

**15.15.** Symbols with established meanings, such as the percent sign (%) and the number mark (#), are likely to cause confusion and should not be used for reference marks.

**15.16.** To avoid possible confusion with numerals and letters frequently occurring in charts and graphs, it is preferable in such instances to use symbols as reference marks.

**15.17.** When items carry several reference marks, the superior-figure reference precedes an asterisk, dagger, or similar character used for reference.

**15.18.** A superior reference mark follows all punctuation marks except a dash, but falls inside a closing parenthesis or bracket if applying only to matter within the parentheses or brackets.

**15.19.** Two or more superior footnote references occurring together are separated by thin spaces.

#### INDEXES AND TABLES OF CONTENTS

**15.20.** Indexes and tables of contents are set in the same style as the text, except that *See* and *see also* are set in italic.

---

¹ When a footnote breaks from an odd (right-hand) page to an even (left-hand) page, the word (*Continued*) is set inside parentheses in italic below the last line of the footnote where the break occurs.

A 50-point rule is used above each part of the footnote.

When a footnote break occurs on facing pages, i.e., from an even page to an odd page, the (*Continued*) line is not set, but the 50-point rule is.

**15.21.** Where a word occurs in an index page column, either alone or with a figure, it is set flush on the right. If the word extends back into the leaders, it is preceded by an en space.

Appendixes A, B, C, and D, maps, illustrations, and excerpts .....	In supplemental volume

**15.22.** For better appearance, Roman numerals should be set in small caps in the figure columns of tables of contents and indexes.

**15.23.** In indexes set with leaders, if the page numbers will not fit in the leader line, the first number only is set in that line and the other numbers are overrun. If the entry makes three or more lines and the last line of figures is not full, do not use a period at the end.

If page folios overrun due to an excessive amount of figures use this form .....	220, 224, 227, 230, 240
And this way when overrun folios make two or more lines .....	220, 224–225, 230–240, 245, 246, 250–255, 258, 300, 320, 330, 350, 360, 370, 380, 390, 400, 410–500, 510, 520, 530, 540, 550, 560, 570, 580, 590, 600–620, 630, 640, 650, 660, 670, 680, 690, 700

(For examples of item indentions in a reading column of indexes set with leaders, see index in this MANUAL.)

**15.24.** Overrun page numbers are indented 3½ ems in measures not over 20 picas and 7 ems in wider measures, more than one line being used if necessary. These indentions are increased as necessary to not less than 2 ems more than the line immediately above or below.

**15.25.** When copy specifies that all overs are to be a certain number of ems, the runovers of the figure column shall be held in 2 ems more than the specified indention.

**15.26.** Examples of block-type indexes:

## OUTLINES

**15.31.** Outlines vary in appearance because there is no one set style to follow in designing them. The width of the measure, the number of levels required for the indentions, and the labeling concept selected to identify each new level all contribute to its individuality.

The following sample outline demonstrates a very basic and structured arrangement. It uses the enumerators listed in rule 8.108 to identify each new indented level.

The enumerators for the first four levels are followed by a period and a fixed amount of space. The enumerators for the second four levels are set in parentheses and followed by the same amount of fixed space.

Each new level indents 2 ems more than the preceding level and data that runs over to the next line aligns with the first word following the enumerator.

**Outline example:**

- I. Balancing a checkbook
  - A. Open your check register
    1. Verify all check numbers
      - a. Verify no check numbers were duplicated
      - b. Verify no check numbers were skipped
  - B. Open your bank statement
    1. Put canceled checks in sequence
    2. Compare amounts on checks to those in register
      - a. Correct any mistakes in register
      - b. Indicate those check numbers cashed
        - (1) Mark off check number on the statement
          - (a) Verify amount of check
            - (i) Highlight discrepancies on statement
              - (aa) Enter figures on back
            - (ii) Enter missing check numbers on back with amounts
              - (aa) Identify missing check numbers in register
              - (bb) Verify those check numbers were not cashed previously

## 16. DATELINES, ADDRESSES, AND SIGNATURES

**16.1.** The general principle involved in the typography of datelines, addresses, and signatures is that they should be set to stand out clearly from the body of the letter or paper which they accompany. This is accomplished by using caps and small caps and italic, as set forth below. Other typographic details are designed to ensure uniformity and good appearance. Street addresses and ZIP Code numbers are not to be used. In certain lists which carry ZIP Code numbers, regular spacing will be used preceding the ZIP Code. Certain general instructions apply alike to datelines, addresses, and signatures.

### General instructions

**16.2.** Principal words in datelines, addresses, and titles accompanying signatures are capitalized.

**16.3.** *Mr.*, *Mrs.*, *Miss*, *Ms.*, and all other titles preceding a name, and *Esq.*, *Jr.*, *Sr.*, and *2d* following a name in address and signature lines, are set in roman caps and lowercase if the name is in caps and small caps or caps and lowercase; if the name is in caps, they are set in caps and small caps, if small caps are available—otherwise in caps and lowercase.

### Spacing

**16.4.** At least 2 points of space should appear between dateline and text or address, address and text, text and signature, and signature and address.

### DATELINES

**16.5.** Datelines at the beginning of a letter or paper are set at the right side of the page, the originating office in caps and small caps, the address and date in italic; if the originating office is not given, the address is set in caps and small caps and the date in italic; if only the date is given, it is set in caps and small caps. Such datelines are indented from the right 1 em for a single line; 3 ems and 1 em, successively, for two lines; and 5 ems, 3 ems, and 1 em, successively, for three lines. In measures 30 picas or wider, these indentions are increased by 1 em.

## 17. USEFUL TABLES

### GEOLOGIC TERMS

[With suggestions by the U.S. Geological Survey]

For capitalization, compounding, and use of quotations in geologic terms, copy is to be followed. The list below exemplifies common usage of both rock and time terms. The term *red beds* has been used to designate certain rocks of mixed lithologic character that are predominantly red; as a unit modifier the use should be *red-bed*.

The terms lower, middle, and upper (referring to rocks) are capitalized only as indicated in the list (Upper Devonian, lower Tertiary, lower Paleozoic); similarly, the terms early, middle, and late (referring to time) are capitalized only as indicated.

A formal geologic term is capitalized: Devonian System, Pliocene Series, San Rafael Group, Morrison Formation, Fayetteville Shale, Wedington Sandstone Member, Wisconsin Glaciation, Tazewell Stade. (Geologic terms quoted verbatim from published material should be left as the original author used them; however, it should be made clear that the usage is that of the original author.)

A structural term such as arch, anticline, syncline, dome, uplift, or basin is not capitalized even if preceded by a name: Cincinnati arch, Cedar Creek anticline, Ozark uplift, Michigan basin. (A physiographic term that is preceded by a name is capitalized: Bighorn Basin, Half Dome.)

¹ Both the French franc and the Spanish peseta are legal tender in Andorra.² Use the term "euro area," not "euro zone." It is incorrect to refer to the euro by nationality, for example, as an Austrian euro or a Belgian euro. However, one may refer to a country's holdings of euros, for example, euro (France) or euro (Germany). The subsidiary units, which used to be the national currencies of the euro area countries, will be used only during the transition period, that is, through June 30, 2002.³ There is no subsidiary unit issued for the CFA franc. However, it is useful to retain the concept of the centime.⁴ Use US\$ instead of \$ when it is not clear that the reference is to the U.S. dollar.⁵ The currency is the renminbi, while the currency unit is the yuan.⁶ Second subsidiary currency unit: jiao; 10 fen = 1 jiao; 10 jiao = 1 yuan.⁷ Second subsidiary currency: millième; 10 millièmes = 1 piastre.⁸ The loti is interchangeable with the South African rand, which remains legal tender.⁹ Second subsidiary currency: mil, 10 mils = 1 cent.¹⁰ For accounting purposes, the ouguiya is also divided into the dixième (= UM 0.10) and the centième (= UM 0.01).¹¹ Use the plural form lei before a figure (e.g., lei 100).¹² "Sterling" is at times used in place of "pounds." When used as an adjective to describe the currency, "sterling" follows "pounds" (i.e., "pounds sterling").¹³ Sudan has introduced the Sudanese dinar to circulate alongside the Sudanese pound. The Sudanese dinar is worth 10 pounds.¹⁴ Second subsidiary currency: chiao; 10 fen = 1 chiao.¹⁵ Both the Yemeni dinar and the Yemeni rial are legal tender in the Republic of Yemen.

## 19. CONGRESSIONAL RECORD

### LAWS AND RULES FOR PUBLICATION OF THE CONGRESSIONAL RECORD

#### CODE OF LAWS OF THE UNITED STATES

**TITLE 44, SECTION 901. CONGRESSIONAL RECORD: ARRANGEMENT, STYLE, CONTENTS, AND INDEXES.**—The Joint Committee on Printing shall control the arrangement and style of the Congressional Record, and while providing that it shall be substantially a verbatim report of proceedings, shall take all needed action for the reduction of unnecessary bulk. It shall provide for the publication of an index of the Congressional Record semimonthly during and at the close of sessions of Congress.

**TITLE 44, SECTION 904. CONGRESSIONAL RECORD: MAPS, DIAGRAMS, ILLUSTRATIONS.**—Maps, diagrams, or illustrations may not be inserted in the Record without the approval of the Joint Committee on Printing.

#### GENERAL RULES

The rules governing document work (FIC & punc.) apply to the Congressional Record, except as may be noted herein. The same general style should be followed in the permanent (bound) Record as is used in the daily Record. All should familiarize themselves with the exceptions and the forms peculiar to the Record.

Much of the data printed in the Congressional Record is forwarded to the GPO via fiber optic transmission using the captured keystrokes of the floor reporters. Element identifier codes are programmatically inserted, and galley output is accomplished without manual intervention. It is not cost effective to prepare the accompanying manuscript as per the GPO Style Manual and it is too time-consuming to update and change the data once it is already in type form. Therefore, the Record is to be FIC & punc. It is not necessary to stamp the copy FIC & punc. because of its volume. However, Record style, as stated in the following rules, will be followed.

Daily and permanent Record texts are set in 8-point type on a 9-point body. Extracts are set in 7-point type on an 8-point body.

An F-dash will be used preceding 8-point cap lines in the proceedings of the Senate and House.

All 7-point extracts and poetry will carry 2 points of space above and below unless heads appear, which generate their own space.

All extracts are set 7 point unless otherwise ordered by the Joint Committee on Printing.

Except as noted below, all communications from the President must be set in 8 point, but if such communications contain extracts, etc., the extracts are set in 7 point.

An address of the President delivered outside of Congress or referred to as an extract is set in 7 point.

A letter from the President to the Senate is set in 7 point when any form of treaty is enclosed that is to be printed in the Record in connection therewith. The letter is set in 7 point whether the treaty follows or precedes it or is separated from it by intervening matter.

In all quoted amendments and excerpts of bills and in reprinting bills, the style and copy as printed in the bill will be followed.

Except where otherwise directed, profanity, obscene wording, or extreme vulgarisms are to be deleted and a 3-em dash substituted therefor.

All manuscript submitted in a foreign language will not be printed. It will be returned for translation and resubmitted for printing in the next Record.

Extreme caution must be used in making corrections in copy, and no important change will be made without proper authorization.

Observe the lists of names of Senators, Representatives, and Delegates, committees of both Houses, and duplicate names. Changes caused by death, resignation, or otherwise must be noted. There is no excuse for error in the spelling of names of Senators, Representatives, or department officials. In case of doubt, the Congressional Directory will be the authority.

Datelines should be followed on Extensions of Remarks. If any question arises as to the proper date to be used, a supervisor must be consulted.

Indented matter in leaderwork will be 1 em only.

Queries must not be made on proofs. In case of doubt, readers will consult the Referee.

### CAPITALIZATION

(See also "Capitalization")

If the name of the Congressional Record is mentioned, it must be set in caps and small caps and never abbreviated, even when appearing in citations.

The name of a Senator or a Representative preceding his or her direct remarks is set in caps and is followed by a period with equal spacing to be used.

The name of a Senator or a Representative used in connection with a bill or other paper—that is, in an adjectival sense—is lower-cased, as the Hawkins bill, the Fish amendment, etc.; but FISH's amendment, etc.

The names of Members and Members-elect of both Houses of the Congress, including those of the Vice President and Speaker, will be printed in caps and small caps if mention is made of them, except in extract matter.

Deceased Members' names will be set in caps and small caps in eulogies only on the first day the House or Senate is in session following the death of a Member, in a speech carrying date when the Member was eulogized, or on memorial day in the Senate and House. Eulogy day in one House will be treated the same in the other.

Certificates of Senators-elect of a succeeding Congress are usually presented to the current Congress, and in such cases the names of the Senators-elect must be in caps and small caps.

Names of Members of Congress must be set in caps and lowercase in votes, in lists set in columns, in the list of standing and select committees, in contested-election cases, in lists of pairs, and in all parts of tabular matter (head, body, and footnotes).

Observe that the names of all persons not certified Members of Congress are to be set in caps and lowercase; that is, names of secretaries, clerks, messengers, and others.

Names of proposed Federal boards, commissions, services, etc., are capitalized.

Capitalize principal words and quote after each of the following terms: *Address, article, book, caption, chapter heading, editorial, essay, heading, headline, motion picture or play* (including TV or radio program), *paper, poem, report, song, subheading, subject, theme*, etc. Also, following the word *entitled*, except with reference to bill titles which are treated as follows: "A bill (or an act) transferring certain functions of the Price Administrator to the Petroleum Administrator for War," etc.

#### FIGURES

Follow the copy as to the use of numerals. Dollar amounts in Record copy are to be followed.

Figures appearing in copy as "20 billion 428 million 125 thousand dollars" should be followed.

#### TABULAR MATTER AND LEADERWORK

Record tables may be set either one or three columns in width, as follows:

One-column table: 14 picas (168 points).

Three-column table: 43½ picas (522 points). Footnote(s) will be set 43½ picas.

All short footnotes should be run in with 2 ems between each.

## ITALIC

Italic, boldface, caps, or small caps shall not be used for emphasis; nor shall unusual indentions be used. This does not apply to literally reproduced quotations from historical, legal, or official documents. If italic other than restricted herein is desired, the words should be underscored and "Fol. ital." written on each folio. Do not construe this to apply to "Provided," "Provided further," "Ordered," "Resolved," "Be it enacted," etc.

Names of vessels must be set in italic, except in headings, where they will be quoted.

The prayer delivered in either House must be set in 8-point roman. If prefaced or followed by a quotation from the Bible, such quotation must be set in 8-point italic. Extracts from the Bible or other literature contained in the body of the prayer will be set in 8-point roman and quoted.

When general or passing mention is made of a case in 8 point, the title is set in roman, as Smith Bros. case. When a specific citation is indicated and reference follows, use italic for title, as *Smith Bros. case* (172 App. Div. 149).

In 8 point copy, titles of cases are always set in italic if followed by references. In 7 point, copy is followed.

In 8-point matter, when only the title of a case is given, set in roman, as United States versus 12 Diamond Rings.

When *versus* is used in other than legal phrases and for the purposes of showing contrast, it is not abbreviated or set in italic, as "airplanes versus battleships."

## MISCELLANEOUS

Do not quote any communication carrying date and signature. However, a letter (or other communication) bearing both date and signature that appears within a letter shall be quoted.

Do not put quotation marks on centerheads in 7-point extracts unless centerheads belong to original matter.

In newspaper extracts, put place and date at beginning of paragraph. Use caps and small caps for name of place and roman lowercase for spelled-out date. Connect date and extract by a period and an em dash. If date and place are credited in a bracket line above extract, they need not be used again at the beginning of the paragraph.

Each *Whereas* in a preamble must begin a new paragraph. The *Therefore be it* must be preceded by a colon and be run in with the last *Whereas*. *Be it* will run in with the word *Therefore*, but must not be supplied when not in copy. Note the following:

Whereas it has been deemed advisable      *Resolved*, That the committee, etc.  
to, etc.: Therefore be it

In the titles of legal cases copy is followed as to spelling, abbreviations, and use of figures.

Use single punctuation in citations of cases and statutes:

*United States v. 12 Diamond Rings* (124 U.S. 329; R.S. p. 310, sec. 1748).

Indent asterisk lines 2 ems on each side. Use five asterisks.

If a title is used as part of the name of an organization, vessel, etc., spell; thus, General Ulysses S. Grant Post No. 76, Grand Army of the Republic.

The order of subdivision of the Constitution of the United States is as follows: article I, section 2, clause 3.

If an exhibit appears at the end of a speech, the head *Exhibit* is set in 7-point caps and small caps.

In extracts containing votes the names must be run in, as Mr. Smith of Texas, AuCoin, and Clay, etc.

In a Senator's or a Representative's remarks, when amendments, sections, etc., are referred to by number, follow the copy.

In text references to Senate and House reports and in executive and miscellaneous documents, follow the copy.

In headings and text references to resolutions and memorials, follow the copy.

#### IN GROSS OR EN GROS

### PARENTHESES AND BRACKETS

[The use of parentheses and brackets will be followed as submitted.]

This legislation would exempt certain defined Central Intelligence Agency [CIA] operational files from the search and review process of the Freedom of Information Act [FOIA], thus permitting the Agency to respond much more quickly to those FOIA requests which are at all likely to result in the release of information.

[Acronyms, symbols, or abbreviations should be bracketed as shown above.]

Mr. CALVERT. Mr. Speaker, I now yield 5 minutes to the gentleman from Oklahoma [Mr. COBURN].

(Mr. GILLMOR of Ohio asked and was given permission to revise and extend his remarks in the RECORD.)

Mr. TAYLOR. There is no “may not” about it. Here is the form in which they are printed.

Mr. GOSS. I am in hopes we shall be able to secure a vote on the bill tonight.

[“Vote! Vote!”]

Mr. YOUNG. The Chair rather gets me on that question. [Laughter.] I did not rise. [Cries of “Vote! Vote!”]

Mr. LUGAR [one of the tellers]. I do not desire to press the point that no quorum has voted.

The CHAIRMAN [after a pause]. If no gentleman claims the floor, the Clerk will proceed with the reading of the bill.

Mr. DUNCAN. Then he is endeavoring to restrict the liberty of the individual in the disbursement of his own money. [Applause on the Republican side.]

Mr. KENNEDY. Mr. Speaker, I desire to ask unanimous consent that the time of the gentleman—[Cries of “Regular order!”]

[Laughter.]

The SPEAKER. Is there objection to the consideration of this bill at this time? [After a pause.] There is no objection.

The CHAIRMAN [rapping with his gavel]. Debate is exhausted.

Mr. JONES of North Carolina [reading]:

When in the course of human events, etc.

[Mr. MILLER of Florida addressed the House. His remarks will appear hereafter in the Extensions of Remarks.]

[Mr. HOYER addressed the Committee [or House]. His remarks will appear hereafter in the Extensions of Remarks.]

[Names of Senators or Representatives appearing in remarks of other Members of Congress should be enclosed in brackets, except in listing of tellers or when some title other than “Mr.” is used, as in the following examples:]

Mr. SMITH of Washington. The gentleman from Florida [Mr. BOYD]

stated that he would support the measure.

Mr. CLAY. The gentleman from Michigan, Mr. BARCIA, stated that he would support the measure.

[In Senate copy a Senator is referred to as "the Senator from — [Mr. —]." Do not supply name and brackets if name does not appear in copy.]

[Note that brackets are used only when *Mr.*, etc., appears in copy.]

[See also use of *Mr.*, *Mrs.*, *Miss*, *Ms.* in explanation of votes under "Pairs."]

## VOTING IN THE HOUSE AND IN COMMITTEE OF THE WHOLE

[Note that a dash is used only when a comma is necessary to separate the ayes and noes. If only the ayes or the noes are given, no punctuation is to be used. If the word *and* is used to connect the ayes and noes, as *ayes 52 and noes 65*, or *52 ayes and 65 noes*, the dash is omitted after the word *were* or *being*.]

On the question of ordering the yeas and nays there were 18 ayes and 88 noes.

The House divided; and there were—ayes 52, noes 65.

So (no further count being called for) the amendment of Mr. SMITH of Virginia was not agreed to.

So (two-thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

So (two-thirds not having voted in favor thereof) the motion was rejected.

The CHAIRMAN. The gentleman raises the point of no quorum. The Chair will count. [After counting.] Two hundred and seventeen present, a quorum. The noes have it, and the amendment is rejected.

The question being taken on the motion of Mr. HOYER to suspend the rules and pass the bill, it was agreed to (two-thirds voting in favor thereof).

So (the affirmative not being one-fifth of the whole vote) the yeas and nays were not ordered.

The question was taken by a viva voce vote, and the Speaker announced that two-thirds appeared to have voted in the affirmative and [after a pause] that the bill was passed.

The yeas and nays were ordered, there being 43 in the affirmative, more than one-fifth of the last vote.

The question being taken on Mr. KENNEDY'S motion, there were—ayes 18, noes 35.

The question being taken on concurring in the amendments of the Senate, there were—ayes 101, noes 5.

The question was taken; and on a division [demanded by Mr. HOYER] there were—ayes 17, noes 29.

Mr. HOYER. Mr. Chairman, I demand a recorded vote, and pending

that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1700

[The above box followed by a four-digit number indicates floor time in the House.]

### QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Minnesota [Mr. OBERSTAR] for a recorded vote.

A recorded vote was refused.

So the amendment to the amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. ENGLISH] as a substitute for the amendment offered by the gentleman from South Dakota [Mr. JOHNSON].

The question was taken; and the Chairman announced that the noes appeared to have it.

### RECORDED VOTE

Mr. ENGLISH. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 223, noes 162, answered "present" 1, not voting 47, as follows:

[Roll No. 275]

AYES—223

Addabbo	Duncan	Hubbard
Akaka	Dwyer	Huckaby

ANSWERED "PRESENT"—1

Brown (OH)

NOT VOTING—47

Ashbrook	Clay	Garcia
Bafalis	Collins (TX)	Gilman

[The Speaker's vote is recorded only in the "Ayes" or "Noes." It is never recorded as "not voting."]

[If the Speaker votes, his name is not used, but at the end of the "yeas" or "nays," according to his vote, insert: "The Speaker."]

So the amendment offered as a substitute for the amendment was agreed to.

The result of the vote was announced as above recorded.

[The word *with* must always be used in pairs in the House, not *and*; and copy must be altered to conform thereto, as Mr. Smith with Mr. Jones—not Mr. Smith and Mr. Jones. Note use of lowercase for names in list of pairs in House.]

[In House pairs do not use brackets when Members are referred to by name. In Senate pairs observe following use of brackets:]

## CREDITS

[From the Sacramento (CA) Bee, July 22,  
 1983]

THE KISSINGER SMOKE SCREEN  
 (By C.K. McClatchy)

The Reagan administration has embarked on a dangerously aggressive, confrontational policy in Latin America that should be sending shock waves of anger and fear through the American public. Thus far, however, the opposition has been muted by a combination of the administration's anti-Communist rhetoric and public relations molasses.

[From the Wall Street Journal, Aug. 1,  
 1983]

THE SKY HASN'T FALLEN

Backers of the proposal to increase the U.S. contribution to the International Monetary Fund by \$8.4 billion staved off several attacks in the House Friday, but the bill still faces an uncertain future. It has been languishing in the House for nearly three months, and the 40 or so amendments still awaiting it testify to the difficulty of putting together a winning coalition.

CASEY AT THE BAT

The outlook wasn't brilliant for the  
 Mudville nine that day:  
 The score stood four to two, with but one  
 inning more to play,  
 And then when Cooney died at first, and  
 Barrows did the same,  
 A pall-like silence fell upon the patrons  
 of the game.  
 A straggling few got up to go in deep de-  
 spair.  
 The rest cling to that hope which springs  
 eternal in the human breast;  
 The thought, "If only Casey could but get  
 a whack at that—  
 We'd put up even money now, with Casey  
 at the bat."  
 But Flynn preceded Casey, as did also  
 Jimmy Blake,  
 And the former was a hoodoo, while the  
 latter was a cake;  
 So upon that stricken multitude grim  
 melancholy sat,  
 For there seemed but little chance of  
 Casey getting to the bat.  
 But Flynn let drive a single, to the won-  
 derment of all,

And Blake, the much despised, tore the  
 cover off the ball;  
 And when the dust had lifted, and men  
 saw what had occurred,  
 There was Jimmy safe at second and  
 Flynn—hugging third.  
 Then from five thousand throats and  
 more there rose a lusty yell;  
 It rumbled through the valley, it rattled  
 in the dell;  
 It pounded on the mountain and recoiled  
 upon the flat,  
 For Casey, mighty Casey, was advancing  
 to the bat.  
 There was ease in Casey's manner as he  
 stepped into his place;  
 There was pride in Casey's bearing and a  
 smile lit Casey's face.  
 And when, responding to the cheers, he  
 lightly doffed his hat,  
 No stranger in the crowd could doubt  
 'twas Casey at the bat.  
 Ten thousand eyes were on him as he  
 rubbed his hands with dirt;  
 Five thousand tongues applauded when he  
 wiped them on his shirt;  
 Then while the writhing pitcher ground  
 the ball into his hip,  
 Defiance flashed in Casey's eye, a sneer  
 curled Casey's lip.  
 And now the leather-covered sphere came  
 hurtling through the air,  
 And Casey stood a-watching it in haughty  
 grandeur there.

Close by the sturdy batsman the ball unheeded sped—	They saw his face grow stern and cold, they saw his muscles strain,
“That ain't my style,” said Casey.	And they knew that Casey wouldn't let that ball go by again.
“Strike one!” the umpire said.	
From the benches, black with people, there went up a muffled roar,	The sneer has fled from Casey's lip, his teeth are clenched in hate;
Like the beating of the storm-waves on a stern and distant shore;	He pounds with cruel violence his bat upon the plate.
“Kill him! Kill the umpire!” shouted some one in the stand;	And now the pitcher holds the ball, and now he lets it go,
And it's likely they'd had killed him had not Casey raised his hand.	And now the air is shattered by the force of Casey's blow.
With a smile of Christian charity great Casey's visage shone;	Oh, somewhere in this favored land the Sun is shining bright;
He stilled the rising tumult; he bade the game go on;	The band is playing somewhere, and somewhere hearts are light,
He signaled to the pitcher, and once more the dun sphere flew;	And somewhere men are laughing, and little children shout;
But Casey still ignored it, and the umpire said “Strike two!”	But there is no joy in Mudville—great Casey has struck out.
“Fraud!” cried the maddened thousands, and echo answered “Fraud!”	
But one scornful look from Casey and the audience was awed.	—Ernest L. Thayer.

**EXTRACTS**

[Extracts must be set in 7 point unless ordered otherwise by the Joint Committee on Printing.]

[This does not refer to a casual quotation of a few words or a quotation that would not make more than 3 lines of 7 point. The beginning of the 7-point extract must start with a true paragraph; 8 point following is always a paragraph.]

Mr. BENNETT. Let us see what that is:

The stipulations of this treaty are to be a full settlement of all claims of said Creek Nation for damages and losses of every kind growing out of the late rebellion—

I do not think he means that—

and all expenditures by the United States of annuities in clothing and feeding refugee and destitute Indians since the diversion of annuities for that purpose consequent upon the late war with the so-

called Confederate States; and the Creeks hereby ratify and confirm—

What?—

all such diversions of annuities heretofore made from the funds of the Creek Nation by the United States; and the United States agree that no annuities—

And so forth. I believe that shows clearly the purpose of the treaty.

[Note, as above, that following an excerpt, the 8 point must begin with a paragraph.]

[An address of the President delivered outside of Congress or referred to as an extract will be set in 7 point.]

**SCHEME OF TEXT HEADINGS**

In 8-point, heads are 8-point caps. After the cap head, all sub-heads are 7 point small caps, regardless of any perceived hierarchy.

In 7-point, the progression is as follows (in descending order):

- 7-point caps and small caps.
- 7-point small caps.
- 7-point italic lowercase.
- 7-point roman caps and lowercase.

## PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Let us pray:

*Lord, Thou hast been our dwelling place in all generations. Before the mountains were brought forth, or ever Thou hadst formed the earth and the world, from everlasting to everlasting Thou art God.—Psalm 90:1-2 RSV.*

Almighty God, eternal Father, make Thy presence felt in this place today. Grant that all who do business here may experience a fresh touch from Thee. As the Senators enter into this very full week, help them to have a perspective which sees the parts in light of the whole. Free them from the tyranny of urgency which makes it impossible to see the forest for the trees. Help them not to allow the transitory to obliterate the transcendent. Give them vision which sees the temporary in light of the permanent, the temporal in light of the eternal.

Guide them to decisions which will honor Thee and bless the people. In Jesus' name. Amen.

HEALTH PLANNING BLOCK GRANT ACT OF 1983

• Ms. SNOWE. Mr. President, I introduce S. 1778, a bill to establish a block grant to the States to support health planning.

The latest authorization for the Federal health planning program expired at the conclusion of the last fiscal year. The program has been funded under a continuing resolution despite the fact that it has not been reauthorized. Health planning has been useful in many States in containing health care costs and assuring equitable access to health

services. It is important that the Federal Government continue to encourage health planning on the State and local levels but the current health planning law should be replaced.●

*Speaker of the House of Representatives.*

### PRAYER¹

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

*O sing to the Lord a new song, for He has done marvelous things!—Psalm 98:1.*

O Lord, You have been with us all our days and blessed us with gifts both great and small. We give thanks that when our spirits were low, You gave new strength, and when we were discouraged, You gave new hope. As You have promised to Your people a new song of joy and peace, so enable us to commit ourselves to the way of truth that we may be ministers of righteousness and heralds of peace in our own day and time. Amen.

The House met at 2 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We and all the generations before us have found assurance and strength in the Book of Psalms and so we are bold to pray: We give thanks to the Lord, for He is good, for His steadfast love endures forever. We give thanks to the God of gods, for His steadfast love endures forever. O let us give thanks to the Lord of lords, for His steadfast love endures forever.

¹Head is not used when the Speaker is in the chair. See following example.

We pray, gracious God, that You would lift our eyes and hearts and minds so that we would see Your steadfast love in all we do. And help us to translate that abiding grace so that we relate to other people with deeds of justice and with hearts of mercy. This is our earnest Prayer. Amen.

**PUNCTUATION**

Comma precedes folio figures.

If numbers of several bills are given, use this form: S. 24, 2586; H.R. 217, 2887, etc.; that is, do not repeat S. or H.R. with each number. Separate the Senate and House bills with a semicolon: S. 24; H.R. 217.

In consecutive numbers (more than two) use an en dash to connect first with last: S46–S48, 518–520.

A 3-em dash is used as a ditto for word or words leading up to colon: example:

Taxation: farm property  
 ——tuition  
 ——withholding

## 20. REPORTS AND HEARINGS

The data for these publications arrives at the GPO from many different sources. The congressional committee staff people are responsible for the gathering of the information printed in these publications.

The report language is compiled from the meetings of the attorneys and congressional members and submitted along with the bill language to the clerks of the respective Houses. The clerks assign the report numbers, etc., and forward to the GPO for typesetting and printing. In many instances the reports are camera ready copy, needing only insertion of the assigned report number.

Likewise, hearings are also compiled by committee staff members. The data or captured keystrokes as submitted by the various reporting services are forwarded to the GPO where the element identifier codes are programmatically inserted and galley or page output is accomplished without manual intervention. It is not cost effective to prepare the manuscript as per the GPO Style Manual as it is too time-consuming to update and change the data once it is already in type form. Therefore, these publications are to be FIC & punc., unless specifically requested otherwise by the committee. It is not necessary to stamp the copy. However, style, as stated in the following rules, will be followed.

### STYLE AND FORMAT OF CONGRESSIONAL REPORTS

**[In either Senate or House reports, follow bill style in extracts from bills. Report numbers run consecutively from first to second session.]**

There are set forth below certain rules which the Government Printing Office has been authorized to follow in the makeup of congressional numbered reports:

1. All excerpts to be set in 10-point type, cut in 2 ems on each side, except as noted in paragraph 3 below. For ellipses in cut-in matter, lines of five stars are used.

2. Contempt proceedings to be considered as excerpts.

3. The following are to be set in 10-point type, but not cut in:

- (a) Letters which are readily identified as such by salutation and signature.

- (b) Appendixes and/or exhibits which have a heading readily identifying them as such; and

- (c) Matter printed in compliance with the Ramseyer rule.¹

---

¹ Ramseyer rule.—House: If report has “Changes in Existing Law” use caps and small caps for heads, except for breakdown within a cap and small cap head.

4. All leaderwork and lists of more than six items to be set in 8-point type.

5. All tabular work to be set in 7-point gothic type.

6. An amendment in the nature of a substitute to be set in 8-point type, but quotations from such amendment later in the report to be treated as excerpts, but set full measure (see 10 below).

7. Any committee print having a report head indicated on original copy to be set in report type and style.

8. Committee prints not having a report head indicated on original copy to be set in committee print style; that is, excerpts to be set in 8 point, full measure.

9. If a committee print set as indicated in paragraph 8 is later submitted as a report or included in a report, and the type is available for pickup, such type shall be picked up and used as is in the report.

10. On matter that is cut in on the left only for purposes of breakdown, no space is used above and below, but on all matter that is cut in on both sides, 4 points are used above and below. If a bill is submitted as an excerpt, it will not be squeezed because of the indentions and the limited number of element identifiers.

11. On reports of immigration cases, set memorandums full measure unless preceded or followed directly by committee language. Memorandums are indented on both sides if followed by such language. Preparers should indicate the proper indention on copy.

**QUESTIONS FROM MR. * * ***

**IMPACT OF FISCAL YEAR 2000 PAY RAISE COSTS**

*Question.* What are the costs associated with the October 1, 1999 4.8 percent general pay raise and the raising of the executive pay cap on January 1, 2000 for fiscal year 2000?

*Answer.* The pay raise for the general scale employees increased the budgeted amount by \$4,826 for fiscal year 2000.

[Note the following style for questions and answers when a person is either asking or answering:]

QUESTION. How are you financing these costs?

Mr. NAME. The general scale increase costing \$4,826 was absorbed by a turnover in one secretarial position, a position which was budgeted at the GS-6 level but filled by a GS-4 level employee who was hired to replace the former * * *

Mr. NAME. In what program areas are you absorbing these costs?

ANSWER. Because of the BIB's ability to absorb these fiscal year 2000 costs in a manner described in the foregoing answer, it has not been necessary to absorb them in program areas.

The subcommittee met, pursuant to call, at 9:35 a.m., in room 304, Cannon House Office Building, Hon. NAME (chairman of the subcommittee) presiding.

Mr. NAME. Today the House Census and Population Subcommittee continues its series of hearings on the impact of the President's budget cuts on the information this Nation will have today, tomorrow, and in the future.

With that we will call up our first panel: Dr. James T. Bonnen, Department of Agricultural Economics, Michigan State University, and the director of the President's Reorganization Project for the Federal Statistical System; and Dr. Stephen E. Fienberg, Department of Statistics, the Carnegie-Mellon University, and the Chairman of the Committee on National Statistics in the National Academy of Sciences.

### STATEMENTS OF JAMES T. BONNEN, DEPARTMENT OF AGRICULTURAL ECONOMICS, MICHIGAN STATE UNIVERSITY AND STEPHEN E. FIENBERG, DEPARTMENT OF STATISTICS, CARNEGIE-MELLON UNIVERSITY

Mr. BONNEN. Thank you, Mr. Garcia. It is a pleasure and a privilege to be here.

I have been asked to comment primarily on the central coordination of statistical planning and policy which was the focus of the study that I directed, as you mentioned.

Ours is an increasingly complex economy and society. If we do not have objective, accurate and relevant information in making decisions, our comprehension of the world will forever run behind events.
